SECTION 1: OVERVIEW

Introduction

The purpose of this Management's Discussion and Analysis ("**MD&A**") is to explain the financial results of Northland Power Inc. ("**Northland**" or the "**Company**") and to assist the reader in understanding the nature and importance of changes and trends as well as the risks and uncertainties that may affect the operating results and financial position of the Company. This MD&A should be read in conjunction with Northland's unaudited interim condensed consolidated financial statements for the three and six months ended June 30, 2022, and 2021, as well as its audited consolidated financial statements for the years ended December 31, 2021 and 2020 ("**2021 Annual Report**") and Northland's most recent Annual Information Form dated February 24, 2022 ("**2021 AIF**"). This material is available on SEDAR at www.sedar.com and on Northland's website at www.northlandpower.com.

This MD&A contains forward-looking statements that are based on certain estimates and assumptions that were considered reasonable on August 11, 2022; actual results may differ materially. Certain prior period disclosures have been reclassified for consistency with the current period presentation. Northland's Audit Committee reviewed this MD&A and the associated unaudited interim condensed consolidated financial statements and notes, and its Board of Directors approved these documents prior to their release.

All dollar amounts set out herein are in thousands of Canadian dollars, unless otherwise stated.

Forward-Looking Statements

This MD&A contains forward-looking statements that are based on certain estimates and assumptions that were considered reasonable on August 11, 2022; actual results may differ materially. Forward-looking statements are provided for the purpose of presenting information about management's current expectations and plans. Readers are cautioned that such statements may not be appropriate for other purposes. Northland's actual results could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, the events anticipated by the forwardlooking statements may or may not transpire or occur. Forward-looking statements include statements that are not historical facts and are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects," "anticipates," "plans," "predicts," "believes," "estimates," "intends," "targets," "projects," "forecasts" or negative versions thereof and other similar expressions or future or conditional verbs such as "may," "will," "should," "would" and "could." These statements may include, without limitation, statements regarding future Adjusted EBITDA, Adjusted Free Cash Flow and Free Cash Flow, respective per share amounts, dividend payments and dividend payout ratios, guidance, the timing for the completion of construction, acquisitions, dispositions, investments or financings, attainment of commercial operations, the potential for future production from project pipelines, cost and output of development projects, litigation claims, plans for raising capital, and the future operations, business, financial condition, financial results, priorities, ongoing objectives, strategies and the outlook of Northland and its subsidiaries. These statements are based upon certain material factors or assumptions that were applied in developing the forward-looking statements, including the design specifications of development projects, the provisions of contracts to which Northland or a subsidiary is a party, management's current plans and its perception of historical trends, current conditions and expected future developments, as well as other factors, estimates and assumptions that are believed to be appropriate in the circumstances. Although these forward-looking statements are based upon management's current reasonable expectations and assumptions, they are subject to numerous risks and uncertainties. Some of the factors include, but are not limited to, risks associated with sales contracts, Northland's reliance on the performance of its offshore wind facilities at Gemini, Nordsee One and Deutsche Bucht for approximately 50% of its Adjusted EBITDA, counterparty risks, contractual operating performance, variability of sales from generating facilities powered by intermittent renewable resources, offshore wind concentration, natural gas and power market risks, operational risks, recovery of utility operating costs, Northland's ability to resolve issues/delays with the relevant regulatory and/or government authorities, permitting, construction risks, project development risks, acquisition risks, financing risks, disposition and joint-venture risks, interest rate and refinancing risks, liquidity risk, inflation risks, impact of regional or global conflicts, credit rating risk, currency fluctuation risk, variability of cash flow and potential impact on dividends, taxation, natural events, environmental risks, health and worker safety risks, market compliance risk, government regulations and policy risks, utility rate regulation risks, international activities, reliance on information technology, labour relations, reputational risk, insurance risk, risks relating to co-ownership, bribery and corruption risk, legal contingencies, and the other factors described in this MD&A and the 2021 AIF. Northland has attempted to identify important factors that could cause actual results to materially differ from current expectations, however, there may be other factors that cause actual results to differ materially from such expectations. Northland's actual results could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur and Northland cautions you not to place undue

reliance upon any such forward-looking statements. The forward-looking statements contained in this MD&A are, unless otherwise indicated, stated as of the dated hereof and are based on assumptions that were considered reasonable as of the date hereof. Other than as specifically required by law, Northland undertakes no obligation to update any forward-looking statements to reflect events or circumstances after such date or to reflect the occurrence of unanticipated events, whether as a result of new information, future events or results, or otherwise.

Non-IFRS Financial Measures

This MD&A includes references to the Company's adjusted earnings before interest, income taxes, depreciation and amortization ("Adjusted EBITDA"), Adjusted Free Cash Flow, Free Cash Flow and applicable payout ratios and per share amounts, measures not prescribed by International Financial Reporting Standards (IFRS), and therefore do not have any standardized meaning under IFRS and may not be comparable to similar measures presented by other companies. Non-IFRS financial measures are presented at Northland's share of underlying operations. These measures should not be considered alternatives to net income (loss), cash flow from operating activities or other measures of financial performance calculated in accordance with IFRS. Rather, these measures are provided to complement IFRS measures in the analysis of Northland's results of operations from management's perspective. Management believes that Northland's non-IFRS financial measures and applicable payout ratio and per share amounts are widely accepted and understood financial indicators used by investors and securities analysts to assess the performance of a company, including its ability to generate cash through operations. For reconciliations of these non-IFRS financial measures to their nearest IFRS measure, refer to *Section 4.5: Adjusted EBITDA* for a reconciliation of consolidated net income (loss) under IFRS to reported Adjusted EBITDA and *Section 4.6: Adjusted Free Cash Flow* and Free Cash Flow.

Adjusted EBITDA

Adjusted EBITDA represents core operating performance of the business excluding leverage, income tax and non-core accounting items. Adjusted EBITDA is calculated as Northland's share of net income (loss) adjusted for the provision for (recovery of) income taxes; depreciation of property, plant and equipment; amortization of contracts and other intangible assets; net finance costs; interest income from Gemini; fair value (gain) loss on derivative contracts; unrealized foreign exchange (gain) loss; (gain) loss on sale of development assets; equity accounting; costs attributable to an asset or business acquisition and other adjustments as appropriate, such as management and incentive fees earned by Northland from non-wholly owned assets. For clarity, Northland's Adjusted EBITDA reflects a reduction for its share of general and administrative costs during development and construction that do not qualify for capitalization.

Management believes Adjusted EBITDA is a meaningful measure of Northland's operating performance because it excludes certain items included in the calculation of net income (loss) that may not be appropriate determinants of long-term operating performance.

Adjusted Free Cash Flow

Adjusted Free Cash Flow represents the cash generated from the business, before investment-related decisions (refer to Section 4.3: Growth Expenditures), and available to pay dividends, while preserving the long-term value of the business. Adjusted Free Cash Flow is calculated as Northland's share of cash provided by operating activities adjusted for short-term changes in operating working capital; non-expansionary capital expenditures; growth expenditures, interest incurred on outstanding debt; scheduled principal repayments and net upfinancing proceeds; major maintenance and debt reserves; interest income from Northland's subordinated loan to Gemini; proceeds from government grants; preferred share dividends; net proceeds from sale of development assets and where net proceeds are received in respect of certain transactions entered in to generate cash flow as part of an active asset management strategy of the overall portfolio; and other adjustments as appropriate. Adjusted Free Cash Flow excludes pre-completion sales required to service debt and related operating costs for projects under construction and excludes costs attributable to an asset or business acquisition.

Where Northland controls the distribution policy of its investments, Adjusted Free Cash Flow reflects Northland's share of the investment's underlying Adjusted Free Cash Flow, otherwise, Northland includes the cash distributions received from the investment. Adjusted Free Cash Flow from foreign operations is translated to Canadian dollars at the exchange rate Northland realizes on cash distributions.

Management believes Adjusted Free Cash Flow is a meaningful measure of Northland's ability to generate cash flow, after on-going obligations, to reinvest in growth and fund dividend payments.

Free Cash Flow

Free Cash Flow is calculated by deducting growth-related expenditures from Adjusted Free Cash Flow. Management believes Free Cash Flow is a meaningful measure of Northland's ability to generate cash flow, after growth-related costs, to fund dividend payments.

For clarity, Northland's Free Cash Flow includes a reduction for expenditures on development activities until an advanced project qualifies for capitalization under IFRS. The Adjusted Free Cash Flow and Free Cash Flow payout ratios, calculated using the respective financial measure, demonstrate the proportion of the respective measure paid as dividends, whether in cash, or in shares under Northland's dividend reinvestment plan (**DRIP**). The net payout ratios indicate the proportion of Free Cash Flow paid as cash dividends. The payout ratios generally reflect Northland's ability to fund growth-related expenditures and sustain dividends.

SECTION 2: NORTHLAND'S BUSINESS

As of June 30, 2022, Northland owns or has a net economic interest in 2,587 megawatts (MW) of power-producing facilities with a total gross operating capacity of approximately 3,010MW and a regulated utility (refer to *Section 3.1: Significant Events* for two facilities disposed in April 2022). Northland's facilities produce electricity from clean energy sources for sale primarily under long-term PPAs or other revenue arrangements with creditworthy counterparties. Northland's utility is a distributor and retailer of electricity compensated under a regulated framework. These operating assets provide stable cash flow and are primarily located in Canada, Germany, the Netherlands, Spain and Colombia. Northland's significant assets under construction and development are located in Mexico, Taiwan, Poland, Germany, Colombia and the United States. Refer to the 2021 AIF for additional information on Northland's key operating facilities as of December 31, 2021, and refer to *SECTION 8: DEVELOPMENT, ACQUISITION AND CONSTRUCTION ACTIVITIES* for additional information on Northland's key development projects.

Northland's MD&A and unaudited interim condensed consolidated financial statements include the results of its operating facilities, as summarized in the following table:

	Gross Production Capacity (MW)	Net Production Capacity (MW) ⁽¹⁾
Offshore Wind	1,184	894
Onshore Renewable		
Canadian Wind	394	314
Canadian Solar	130	115
Spanish Wind	443	435
Spanish Solar	116	116
Efficient Natural Gas		
Canada ⁽²⁾	743	713
Utility		
Colombia	n/a	n/a
Total	3,010	2,587

(1) Presented at Northland's economic interest.

(2) As at June 30, 2022, Northland's economic interest was changed from December 31, 2021 due to the sale of two efficient natural gas facilities in April 2022 (refer to 3.1: Significant Events for more information).

In addition to operational assets, summarized below are Northland's most significant projects under construction and under development as well as other identified projects. The table below excludes the Company's larger pipeline of earlier stage development opportunities which may or may not be secured.

Project	Geographic Region	Technology	Gross Capacity (MW)	Current ownership	Development Stage	Contract type	Estimated COD
Construction Pro	jects						
Ball Hill	United States	Onshore wind	108	100%	Under construction	20-year PPA	2022
Bluestone	United States	Onshore wind	112	100%	Under construction	20-year PPA	2022
La Lucha	Mexico	Solar	130	100%	Under construction	TBD	2022
Helios	Colombia	Solar	16	100%	Under construction	12-year PPA	2022
Total			366				
Capitalized Grow	th Projects						
Suba	Colombia	Solar	130	50%	Late-stage	15-year PPA	2023
High Bridge	United States	Onshore wind	100	100%	Mid/late-stage	20-year PPA	2024
Hai Long	Taiwan	Offshore wind	1,044	60%	Late-stage	20-year PPA	2026/2027
Baltic Power	Poland	Offshore wind	Up to 1,200	49%	Mid/late-stage	25-year CfD	2026
Nordsee Two	Germany	Offshore wind	433	49%	Mid-stage	TBD ⁽¹⁾	2026
Total			2,907				
Identified Growt	h Projects						
Nordsee Three	Germany	Offshore wind	420	49%	Mid-stage		
Nordsee Delta	Germany	Offshore wind	480	49%	Mid-stage		
Chiba	Japan	Offshore wind	600	50%	Early/mid-stage	2027	
Dado Ocean	South Korea	Offshore wind	Up to 1,000	100%	Early/mid-stage	2027 - 2	2030+
ScotWind	Scotland	Offshore wind	2,340	100%	Early-stage		
Hecate	Canada	Offshore wind	400	100%	Early-stage		
Total			5,240				
Total Pipeline ⁽²⁾			8,513				

Nordsee Two has secured interconnection rights for zero subsidy bid, with the intention to secure a long-term corporate power purchase agreement.
Excludes ~5,900MW of other pipeline projects.

SECTION 3: CONSOLIDATED HIGHLIGHTS

3.1: Significant Events

Significant events during the first half of 2022 and through the date of this MD&A are described below. Refer to SECTION 8: DEVELOPMENT, ACQUISITION AND CONSTRUCTION ACTIVITIES for additional relevant information.

Balance Sheet:

Kirkland Lake Refinancing

On June 2, 2022, Northland restructured and upsized its Kirkland Lake credit facility (the "**Kirkland Lake facility**"), and resulting in Northland receiving one-time management fee income of \$34 million, net of closing costs (the "**Kirkland Lake management fee**"). The aggregate amount of the financing was upsized to \$47 million, and the loan maturity date was extended by eight years to March 31, 2030. The restructured Kirkland Lake facility continues to be denominated in Canadian dollars, with the applicable interest rate increasing to 4.2% (all in rate) from the previous rate of 2.8%. The net proceeds from the restructuring are consistent with expectations and have been included in Northland's 2022 guidance.

Sale of Two End-of-Contract Efficient Natural Gas Facilities

On April 7, 2022, Northland completed the sale of its Iroquois Falls and Kingston efficient natural gas facilities in Ontario. The two facilities had a combined operating capacity of 230MW and the sale resulted in a 24% reduction in Northland's gasfired capacity. The sale further supports efforts to reduce Northland's carbon intensity and repatriate capital to fund the growth of our renewable development projects around the globe. Both facilities had operated under long-term power purchase agreements with the provincial system operator, which expired at the end of 2021 and 2017, respectively. The net proceeds from the sale have been recorded in the consolidated statement of income (loss), Adjusted Free Cash Flow and Free Cash Flow.

At-The-Market Equity Program Established

On March 1, 2022, Northland established an at-the-market equity ("**ATM program**") that allows Northland to issue up to \$500 million of common shares from treasury, at Northland's discretion. The program provides Northland with an additional source of financing flexibility to fund its growth initiatives.

During the six months ended June 30, 2022, Northland issued 7,487,700 common shares under the ATM program at an average price of \$39.94 per common share for gross proceeds of \$299 million (net proceeds \$295 million). As at August 11, 2022, Northland has issued a total of 7,918,000 common shares at an average price of \$39.85 per share for gross proceeds of \$315 million (net proceeds \$311 million).

Corporate Credit Rating Re-affirmed

In May 2022, Standard & Poor's reaffirmed Northland's corporate credit rating of BBB (Stable). In addition, Northland's preferred share rating was reaffirmed on Standard & Poor's Canada scale of BB+.

Renewables Growth updates:

To achieve our long-term growth objectives, Northland has established regional development offices to secure certain growth opportunities across the globe. The activity from these offices has generated a robust portfolio of projects at various stages of development and construction. The successful achievement of commercial operations of these projects is expected to deliver long-term, sustainable growth in the Company's Adjusted EBITDA, Adjusted Free Cash Flow and Free Cash Flow. The following provides updates on the progress being made on Northland's active development portfolio.

Hai Long Offshore Wind Project

Progress continues at Hai Long to advance the project towards financial close. Subsequent to quarter end, Northland announced the signing of a Corporate Power Purchase Agreement (**CPPA**) that covers 100 percent of the power generated from Hai Long 2B and 3, which have a combined capacity of 744MW. The agreement is with an investment grade counterparty (S&P: AA-) and is for a 20-year period at a fixed-price, commencing once Hai Long reaches full commercial operations in late 2026. The contracted price under the CPPA is more favourable than the fixed auction rate originally awarded in 2018 and is a key accomplishment as Northland progresses Hai Long towards financial close. In addition, the PPAs with Taipower are not affected by the signing of the CPPA and provide a backstop to the CPPA. With the CPPA signed, the Company is focused on securing non-recourse project level debt financing. While securing financing terms are still subject to several macro factors, there is currently strong lender interest from various global and local financial institutions in lending to the project for the long term.

New York Onshore Wind Projects

Construction activities at the Ball Hill and Bluestone onshore wind projects in New York State are progressing on schedule. The projects are expected to complete construction activities and commence commercial operations by the end of 2022. The total capital costs for the two projects are expected to be US\$600 million. The projects were previously awarded 20-year indexed REC agreements with the New York State Energy Research and Development Authority.

Northland's third onshore wind project in New York, High Bridge, which has been under development and was scheduled to achieve financial close in 2022 and commercial operations in 2023. Considering the current inflationary environment and the potential impacts from the expected passing of the *Inflation Reduction Act* bill in the United States, financial close and commercial operations are expected to occur later than originally planned.

ScotWind Offshore Wind Auction Success

On January 17, 2022, Northland announced that it was awarded two offshore wind leases in the Crown Estate Scotland auction with a total combined capacity of 2,340MW. The two leases, one fixed foundation (840MW) and one floating foundation (1,500MW), will extend Northland's development runway into the next decade, with commercial operations expected at the end of 2029/2030 for the fixed and early 2030s for the floating. In April 2022, Northland entered into an Option Lease Agreement with the Scottish government which provides the Company with development exclusivity over the two awarded sites for a period of up to 10 years. Northland has secured its right to the offshore region upon payment of GBP 20 million (\$33 million).

Nordsee Offshore Wind Cluster

In January 2022, Northland and its German partner, RWE Renewables GmbH (**RWE**), announced the formation of a 1,333MW Nordsee Offshore Wind Cluster partnership (the "**Cluster**") encompassing Nordsee Two (433MW), Nordsee Three (420MW) and Nordsee Delta (480MW). To further enhance the size and scale of the cluster and to realize additional synergies, Northland and RWE agreed to include a fourth project, resulting in the total size of the Cluster growing to over 1.5GW. The fourth project, Godewind, which is now included in the Cluster, will have production capacity of 225MW and is within proximity to the remaining projects. The transaction is pending formal closing. The projects are expected to be developed and managed on a joint basis by both parties and are expected to achieve commercial operations between 2026 and 2028. Northland holds a 49% interest in the Cluster with RWE holding 51%.

Colombian Solar Projects

Development progress at the 130MW Suba solar projects in Colombia continues, with the project team working to secure agreements and contracts needed as the projects move towards the financial close. The solar projects will benefit from 15-year offtake agreements with multiple energy distribution and commercial entities in Colombia. Northland has a 50% interest in the projects alongside its partner, EDF Renewables, with commercial operations expected in second half of 2023.

Other:

Executive changes

Northland announces a change in its executive team with the departure of Morten Melin, Executive Vice President, Construction effective August 12, 2022. Management thanks Mr. Melin for all of his contributions and wishes him all the best for the future.

3.2: Operating Highlights

The following table presents key IFRS and non-IFRS financial measures and operational results:

Summary of Consolidated Results

	Three mont	hs en	ded June 30,	Six Mon	ths En	ded June 30,

4.1: Operating Results

Offshore Wind Facilities

Northland's three offshore wind facilities, Gemini, Nordsee One and Deutsche Bucht, are located off the coasts of the Netherlands and Germany. Wind power generation harnesses renewable wind energy by converting the kinetic energy of wind into electrical energy. Wind facilities are subject to seasonality, and accordingly, tend to produce more electricity during winter due to denser air and higher winds compared to summer, the effect of which is reflected in the respective fiscal quarter's results. In addition, variability in offshore wind facilities results in similar fluctuations in quarter-to-quarter financial results. Factors such as exposure to market prices, and turbine or grid availability can also have a significant effect on financial results, though typically to a lesser extent than variability in wind resource. For the six months ended June 30, 2022, Gemini, Nordsee One and Deutsche Bucht contributed approximately 22%, 14% and 13%, respectively, of Northland's reported Adjusted EBITDA from facilities.

Results for Northland's offshore wind facilities are also affected by foreign exchange rate fluctuations between the Euro and Canadian dollar, which primarily affect sales, net income and Adjusted EBITDA. Northland has entered into long-term foreign exchange rate hedges, at an average rate of \$1.59/€ for 2022 compared to \$1.60/€ for 2021 for a substantial portion of anticipated euro-denominated Adjusted Free Cash Flow, mitigating the effects of foreign exchange rate fluctuations with respect to this metric.

Variability within Operating Results

Gemini has subsidy agreements with the Government of the Netherlands which expire in 2031. Under these agreements, revenue is earned through a combination of annual average Dutch wholesale market price ("APX"), a subsidy top-up ("SDE") to €211 per MWh plus a markup to compensate for annual profile and imbalance (P&I) costs, which are variable from year to year, generally ranging between 10-15%. The SDE mechanism is designed to top-up the APX for up to 1,908 gigawatt hours of annual production ("Gemini Subsidy Cap") and is designed to ensure the full subsidy is received by Gemini annually, or an equivalent amount from market price. For production beyond the Gemini Subsidy Cap of 1,908 GWh, revenue is earned at the APX less P&I costs. However, if full year APX exceeds the set price of €211 per MWh, Gemini's revenue is earned at APX less P&I costs for the entire production.

The SDE is subject to an annual contractual floor price (the "**SDE floor**"), thereby exposing Gemini to market price risk if the APX falls below the effective annual SDE floor of ≤ 51 /MWh. The APX has been below the SDE floor for the majority of Gemini's five years of operation, with the exception of 2021 (APX of ≤ 103 /MWh) and to date 2022. As at June 30, 2022, management estimated 2022 APX to be approximately ≤ 266 /MWh based on realized daily spot prices to date and forward prices observed for the balance of the year on the European Energy Exchange.

Nordsee One and Deutsche Bucht have a Feed-In Tariff contract with the German government whereby the associated tariff is added to the German wholesale market price ("wholesale rate"), effectively generating a fixed unit price for energy sold, except when the [monthly] wholesale rate exceeds the contractual FIT rate for the facility. The realized wholesale rate is reduced by various capture costs between 10% to 20% of the rate.

Under the German Renewable Energy Sources Act (**EEG**), while the tariff compensates for most production curtailments required by the system operator, the facilities do not receive revenue for periods where the market power price remains negative for longer than six consecutive hours ("**negative prices**"). The facilities are also subject to unpaid curtailments by the German system operator for scheduled and unscheduled grid repairs ("**grid outages**") of up to 28 days annually at each facility, which can have a significant effect on earnings depending on the season.

Gemini APX Hedges

In 2021, Northland entered into financial derivatives, resulting in the crystallization of financial losses for 2022 and 2023 ("**APX hedge losses**"), which are reflected in the financial guidance for 2022. Refer to the 2021 Annual Report for more information.

Nordsee One Component Issue

As disclosed in the 2021 Annual Report, Northland identified a component defect on several wind turbines at Nordsee One affecting the main rotor shaft assembly (**RSA**) and upon further assessment, management concluded the defect could affect all 54 of the wind turbines, and commenced replacement of the rotor shaft assembly of all turbines (the "**replacement campaign**").

Having replaced ten RSAs last year, in the first six months of 2022, Nordsee One has replaced an additional 25 RSAs and now expects to replace the remaining 19 RSAs by October 2022 during the seasonally low wind resource period, minimizing the loss of revenues during replacement.

The total replacement cost in 2022 is expected to remain in the range of €40 million to €50 million (\$50 million to \$60 million at Northland's share), with costs are expected to be almost entirely covered by the warranty bond settlement proceeds received in 2020 relating to outstanding warranty obligations of Nordsee One's turbine manufacture. Refer to the 2021 Annual Report for additional information on the component issue.

Nordsee One may curtail the performance of affected turbines to briefly extend their life, which can reduce electricity production ("**turbine availability**") and affect sales. Nordsee One incurred lost sales due to turbine availability of €4 million (\$5 million at Northland's share) in the first six months of 2022.

Operating Performance

An important indicator for the offshore wind facilities is the historical average of the power production of each offshore wind facility, where available. The following table summarizes actual electricity production and the historical average, high and low for the applicable operating periods of each offshore facility:

		Three m	onths ended June	30,	
	2022 ⁽¹⁾	2021 ⁽¹⁾	Historical Average ⁽¹⁾	Historical High ⁽¹⁾	Historical Low ⁽¹⁾
Electricity production (GWh)					
Gemini	444	385	440	493	385
Nordsee One	190	150	186	220	150
Deutsche Bucht	170	165	159	170	141
Total	804	700			

		Six mo	nths ended June 30),	
	2022 ⁽¹⁾	2021 ⁽¹⁾	Historical Average ⁽¹⁾	Historical High ⁽¹⁾	Historical Low ⁽¹⁾
Electricity production (GWh)					
Gemini	1,166	1,053	1,144	1,232	1,053
Nordsee One	547	461	532	572	461
Deutsche Bucht	492	444	475	492	444
Total	2,205	1,958			

(1) Includes GWh produced and attributed to paid curtailments.

(2) Represents the historical power production for the period since the commencement of commercial operation of the respective facility (2017 for Gemini and Nordsee One, and 2020 for Deutsche Bucht) and excludes unpaid curtailments.

Electricity production for the three months ended June 30, 2022, increased 15% or 103GWh compared to the same quarter of 2021 primarily due to higher wind resource and fewer unpaid curtailments related to negative prices in Germany, partially offset by higher uncompensated grid outages at the German facilities. Electricity production for the six months ended June 30, 2022, increased 13% or 246GWh compared to the same period of 2021 primarily due to higher wind resource and fewer unpaid curtailments related to negative prices in Germany, partially offset by reduced turbine availability at Nordsee One due to the RSA replacement campaign.

Sales of \$246 million for the three months ended June 30, 2022, increased 20% or \$41 million compared to the same quarter of 2021 primarily due to higher market prices at our offshore wind facilities, most notably at our Gemini facility and higher production across all facilities. The continued strength in energy prices across Europe resulted in the APX exceeding the SDE for Gemini, allowing for the realization of \$21 million of higher revenues in the quarter. These higher revenues were partially offset by foreign exchange rate fluctuations, which reduced sales by \$22 million compared to the same quarter of 2021. Adjusted Free Cash Flow and Free Cash Flow are largely hedged and were therefore unaffected by foreign exchange movements. The final revenues realized for 2022 will depend on the average APX market price over the course of the year, which is currently estimated at €266/MWh as at June 30, 2022, excluding P&I costs. Sales of \$642 million for the six months ended June 30, 2022, increased 12% or \$66 million compared to 2021 primarily due to same factors as above. The effect of APX being above the SDE of €211/MWh resulted in \$56 million additional sales in the first six months, excluding exchange rate fluctuations.

Sales were also adversely affected by factors other than wind resource, as summarized in the following table:

	Three months	s ended June 30,	Six months ended June 30,				
	2022	2021		2022		2021	
Effect of Gemini APX hedge losses ⁽¹⁾	5,025	\$ 7,622	\$	10,225	\$	12,043	
Lower turbine availability at Nordsee One (due to RSA campaign)	2,600	3,126		5,242		3,645	
Unpaid curtailment due to negative prices in Germany	332	4,418		1,145		6,263	
Unpaid curtailment due to grid outages in Germany \$	7,223	5,253	\$	7,245	\$	7,263	

(1) Realized APX hedge losses are not reported in Sales but do affect Adjusted EBITDA and Adjusted Free Cash Flow.

Operating costs of \$41 million and \$79 million for the three and six months ended June 30, 2022, decreased 11% or \$5 million and 7% or \$6 million, respectively, compared to the same periods of 2021 primarily due to the effect of foreign exchange rate fluctuations.

Operating income and *Adjusted EBITDA* of \$121 million and \$141 million, respectively, for the three months ended June 30, 2022, increased 73% or \$51 million and 24% or \$28 million compared to the same quarter of 2021 primarily due to higher wind resource across all three facilities, higher APX at Gemini and fewer unpaid curtailments related to negative prices in Germany, partially offset by higher uncompensated outages at the German facilities and foreign exchange rate fluctuations. Operating income and Adjusted EBITDA of \$392 million and \$403 million, respectively, for the six months ended June 30, 2022, increased 25% or \$80 million and 13% or \$48 million compared to the same period of 2021 primarily due to higher wind resource and fewer unpaid curtailments related to negative prices in Germany, partially offset by reduced turbine availability at Nordsee One due to the RSA replacement campaign.

Onshore Renewable Facilities

Northland's onshore renewables comprise onshore wind and solar facilities located in Canada and Spain. Onshore wind facilities are similar in nature operationally to offshore wind; however, with lower operating costs and generally lower wind resource. Solar power facilities have lower fixed operating costs per unit of capacity than other renewable power technologies. Electricity production from solar facilities tends to be less variable than wind but is limited to available sunlight, which is generally higher in the summer than in the winter. For the six months ended June 30, 2022, Northland's onshore renewable facilities in Canada and Spain contributed approximately 10% and 16%, respectively, of reported Adjusted EBITDA from facilities.

Northland has entered into long-term Euro denominated foreign exchange hedges, at an average rate of \$1.73/€1, which hedges the majority of projected distributions from the Spanish portfolio from 2022-2035 to mitigate foreign exchange rate volatility, consistent with its corporate risk mitigation strategy.

The Spanish portfolio, acquired in August 2021, is comprised of onshore wind (435MW), solar photovoltaic (66MW), and concentrated solar (50MW) assets located throughout Spain. The Spanish portfolio operates under a regulated asset base (**RAB**) framework that guarantees a specified pre-tax rate of return of 7.4% for 23 sites and 7.1% for 10 sites, over the full regulatory life of the facilities, regardless of settled wholesale power prices ("**pool prices**"). Refer to the 2021 Annual Report for additional information.

Revenue from the Spanish facilities is primarily comprised of two main components, return on investment ("**Ri**") as well as a larger component based on pool prices. While a renewables operator may collect the settled pool price per MWh produced, under IFRS 15, revenue is only recognized at the pool price originally forecasted by the Spanish regulator at the start of the regulatory semi-period (the "**posted price**"). Under IFRS, any pool price revenue collected significantly in excess of (or below) the stated pool price in the current regulatory semi-period (known as "**band adjustments**") is deferred and recognized over the remaining regulatory periods.

Spain regulatory changes

In early 2022, in response to the unprecedented high energy prices for consumers, Spanish authorities announced their intention to make an exceptional update to the regulatory framework for the calendar year 2022 and the period 2023-2025. These regulatory amendments, effective retrospectively from January 1, 2022, are pending governmental approval and are expected to result in higher merchant revenue exposure for 2022 as a result of an increase in the posted pool price from €49/MWh to €122/MWh, thus allowing generation facilities to realize higher sales in the current year. In addition, there will also be changes to the band adjustments for 2022 that will also permit the recognition of deferred revenue from 2020 and 2021 in 2022, earlier than the original regulation allowed for. However, these increases will be partially offset by a reduction in regulated revenue from Ri.

The anticipated effect of these changes for 2022 will result in higher sales in the range of \$50 to \$60 million for the year. As a result of the improved financial performance, higher debt repayments are expected under lender requirements, scheduled to be finalized later in 2022. The long-term financial performance of the Spanish portfolio continues to be underpinned by the regulated return associated with the facilities.

Electricity production at the onshore renewable facilities for the three months ended June 30, 2022, was 96% or 285GWh higher than the same quarter of 2021 due to the contribution from the Spanish portfolio and higher production from the Canadian onshore wind facilities partially offset by lower solar resource. Electricity production for the six months ended June 30, 2022, was 88% or 574GWh higher than 2021 due to the same factors. For the three and six months ended June 30, 2022, the Spanish portfolio generated 188GWh and 411GWh, respectively, from onshore wind sites, which was below expectations due to lower wind resource, and 66GWh and 98GWh, respectively, from the solar sites.

Adjusted EBITDA for the three and six months ended June 30, 2022, was higher than 2021 due to the contribution from the Spanish portfolio. Excluding the contribution from the Spanish portfolio, for the three months ended June 30, 2022, production, sales and Adjusted EBITDA were 11%, 4% and 5% higher, respectively, compared to the same quarter of 2021, primarily due to a higher wind resource at the Canadian wind facilities, partially offset by lower solar resource. For the six months ended June 30, 2022, production, sales and Adjusted EBITDA from the Canadian onshore facilities were 10%, 4% and 5% higher, respectively, compared to the same period of 2021 due to the same reasons as above. The Spanish portfolio generated sales, Adjusted EBITDA and Adjusted Free Cash Flow of \$70 million, \$65 million and \$32 million, respectively, for the three months ended June 30, 2022, partially affected by lower than expected wind resource. Sales, Adjusted EBITDA and Adjusted Free Cash Flow of \$68 million, respectively, for the six months ended June 30, 2022, due to the same reasons as above.

Efficient Natural Gas Facilities

The contractual structures of Northland's efficient natural gas facilities ensure each facility's gross profit is generally stable, within a seasonal profile, regardless of production or sales levels, so long as the plant is available. Under some PPAs, the facility is reimbursed for certain costs of sales by the counterparty. For the six months ended June 30, 2022, Northland's efficient natural gas facilities contributed approximately 18% of reported Adjusted EBITDA from facilities, with the two largest, North Battleford and Thorold accounting for approximately 11%.

On April 7, 2022, Northland completed the sale of Iroquois Falls and Kingston, with a combined operating capacity of 230MW, that previously operated under long-term power purchase agreements which expired at the end of 2021 and 2017, respectively.

Electricity production for the three and six months ended June 30, 2022, increased 30% or 161GWh and 4% or 68GWh, respectively, compared to the same periods of 2021 due to the effect of a planned maintenance outage last year at North Battleford and partially offset by the effect of Kirkland Lake operating under an enhanced dispatch contract (**EDC**) compared to a baseload PPA for the same periods last year.

Adjusted EBITDA for the three and six months ended June 30, 2022, increased 74% and 13%, respectively, compared to the same periods of 2021 primarily due to higher production at North Battleford and Thorold and also from Kirkland Lake's one-time management fee. The increases were partially offset by the sale of Iroquois Falls.

Utility

EBSA's net sales are almost entirely regulated, of which the vast majority is earned from its distribution business and the remainder primarily from its electricity retail business. EBSA's results are affected by exchange rate fluctuations between the Canadian dollar and the Colombian peso. For 2022, Northland has hedged the foreign exchange rate at COP\$3097:CAD\$1 (2021: COP\$2,830:CAD\$1) for nearly all of the anticipated Colombian peso-denominated cash flow, mitigating the effects of fluctuations in the foreign exchange rate on Adjusted Free Cash Flow. For the six months ended June 30, 2022, EBSA contributed approximately 7% of reported Adjusted EBITDA from facilities.

Sales and gross profit of \$70 million and \$49 million for the three months ended June 30, 2022, increased 33% or \$18 million and 34% or \$13 million, respectively, compared to the same quarter of 2021 primarily due to rate escalations, driven by a producer price index increases, positively affecting EBSA's 2022 financial performance. Sales and gross profit of \$136 million and \$94 million for the six months ended June 30, 2022, increased 23% or \$26 million and 23% or \$18 million, respectively, compared to the same period of 2021 primarily due to the same factors.

Operating income of \$22 million and \$43 million for the three and six months ended June 30, 2022, increased 63% or \$8 million and 51% or \$14 million, respectively, compared to the same periods of 2021 due to the same factors described above.

Adjusted EBITDA of \$29 million and \$57 million for the three and six months ended June 30, 2022, increased 38% or \$8 million and 28% or \$13 million, respectively, compared to the same periods of 2021 due to the same factors described above.

In December 2021, Northland restructured and upsized EBSA's long-term, non-recourse financing (the **"EBSA Facility**"), resulting in \$84 million of incremental cash proceeds to Northland, net of closing costs. The upsizing of the EBSA Facility was completed on the basis of growth in EBSA's projected EBITDA growth for 2022, based on increases in the rate base. Net upsizing proceeds, in excess of EBSA's expansionary capital expenditure needs, of \$17 million are included in Adjusted Free Cash Flow and Free Cash Flow for the first six months of 2022.

For EBSA, non-expansionary capital expenditures are required to maintain its regulated asset base under the requirements of the local regulator. Such expenditures are largely driven by the requirements of the regulatory framework, though the timing of the capital expenditures can vary from year to year and can be seasonal, therefore, affecting Adjusted Free Cash Flow as reported.

4.2: General and Administrative Costs

	Three mont	ed June 30,	Six months ended June 30,			
	2022		2021	2022		2021
Corporate G&A	\$ 12,651	\$	8,769	\$ 26,026	\$	17,944
Operations G&A ⁽¹⁾	7,275		6,095	13,628		12,817
Total G&A costs	\$ 19,926	\$	14,864	\$ 39,654	\$	30,761

The following table summarizes general and administrative (G&A) costs:

(1) Operations G&A is included in the respective segment's Adjusted EBITDA and Adjusted Free Cash Flow presented in Section 4.1 Operating Results.

Corporate G&A costs of \$13 million and \$26 million for the three and six months ended June 30, 2022, were 44% or \$4 million and 45% or \$8 million, respectively, higher than the same periods of 2021 primarily due to higher personnel and other costs supporting Northland's global growth, in line with management's expectations.

Operations G&A is incurred at the operating facilities, and for the three and six months ended June 30, 2022, were largely in line with the same periods of 2021.

4.3: Growth Expenditures

The following table summarizes development costs (charged to expense under IFRS) and growth expenditures for non-IFRS financial measures:

	Three mont	hs end	led June 30,	Six mont	hs end	ed June 30,
	2022		2021	2022		2021
Business development	\$ 3,967	\$	8,176	\$ 8,609	\$	13,533
Project development	3,631		295	6,279		295
Development overhead	7,111		5,283	17,108		12,012
Acquisition costs ⁽¹⁾	137		714	618		2,333
Development costs	\$ 14,846	\$	14,468	\$ 32,614	\$	28,173
Joint venture project development costs ⁽²⁾	1,758		3,102	2,081		3,857
Growth expenditures ⁽³⁾	\$ 16,467	\$	16,856	\$ 34,077	\$	29,697
Growth expenditures on a per share basis				\$ 0.15	\$	0.14

(1) Relates to successful acquisition costs only. Excluded from growth expenditures.

(2) Includes Northland's share of development costs incurred at Baltic Power, Chiba and other joint venture projects.

(3) Excludes acquisition costs but includes share of project development costs incurred by joint ventures.

To achieve its long-term growth objectives, Northland expects to deploy early-stage investment capital (growth expenditures) to advance its projects. With regional development offices in Europe, Asia, North America and Latin America fully functional and with a pipeline of growth opportunities currently secured, Northland expects to incur higher growth expenditures and capital investments in future years to fund its identified development pipeline and opportunities sourced through the regional development offices.

Growth expenditures are excluded from Adjusted Free Cash Flow. However, these growth expenditures reduce near-term Free Cash Flow until projects achieve capitalization under IFRS but should deliver sustainable growth in Free Cash Flow over the long-run.

Business development costs are incurred to identify and explore prospective business and development opportunities, which are expected to result in identifiable development projects intended to be pursued to completion, and include costs incurred for projects not ultimately pursued to the acquisition or to completion. Business development costs for the three and six months ended June 30, 2022 were lower compared to the same periods of 2021 due to the timing of development activities pursuing opportunities.

Project development costs are attributable to identified early- to mid-stage development projects under active development that are likely to generate cash flow over the long-run, though do not yet meet capitalization criteria under IFRS. For the three and six months ended June 30, 2022, project development costs increased over the same periods of 2021 due to the advancement of a growing number of early- to mid-stage development projects. Refer to SECTION 8: DEVELOPMENT, ACQUISITION AND CONSTRUCTION ACTIVITIES for additional information on identified development projects.

Development overhead primarily relates to personnel, rent and other office costs not directly attributable to specific development projects. Development overhead reflects Northland's resources and development offices in key target jurisdictions focused on securing long-term growth opportunities in those jurisdictions. Development overhead costs for the three and six months ended June 30, 2022, were higher than the same periods of 2021 primarily due to higher personnel and other costs in support of Northland's global growth.

Acquisition costs are generally third-party transaction-related costs directly attributable to an executed business acquisition, such as the Spanish portfolio, and are excluded from Northland's non-IFRS financial measures.

Management expects growth expenditures in 2022 to remain in line with guidance issued in February 2022 at approximately \$100 million.

4.4: Consolidated Results

The following discussion of the significant factors contributing to the consolidated financial results should be read in conjunction with Northland's unaudited interim condensed consolidated financial statements for the six months ended June 30, 2022.

Second Quarter

Sales of \$557 million increased 36% or \$148 million compared to the same quarter of 2021 primarily due to improved results from the offshore wind facilities, contribution from the Spanish portfolio acquired in August 2021 further catalyzed by the increase in the market/pool price due to the recently announced regulatory changes, partially offset by the expiry of the PPA at Iroquois Falls and foreign exchange rate fluctuations.

Gross profit of \$485 million increased 32% or \$117 million compared to the same quarter of 2021 primarily due to the same factors affecting sales.

Operating costs of \$77 million decreased 3% or \$2 million compared to the same quarter of 2021 primarily due to the effect of foreign exchange rate fluctuations.

G&A costs of \$20 million increased 34% or \$5 million primarily due to higher personnel and other costs supporting Northland's global growth, in line with management's expectations.

Development costs of \$15 million are in line with the same quarter of 2021.

Finance costs, net (primarily interest expense) of \$77 million increased 3% or \$2 million compared to the same quarter of 2021 primarily due to an increase in debt associated with the acquisition of the Spanish portfolio, partially offset by the scheduled repayments on facility-level loans.

Fair value gain on derivative contracts was \$235 million compared to a \$25 million loss in the same quarter of 2021 primarily due to net movement in the fair value of derivatives related to commodity, interest rates and foreign exchange contracts.

Foreign exchange loss of \$35 million was primarily due to unrealized losses from fluctuations in the closing foreign exchange rates.

Other income was \$18 million higher than the same period of 2021 primarily due to the gain on sale of two efficient natural gas facilities, partially offset by the share of increasing joint venture development costs.

Net income of \$268 million in the second quarter of 2022 compared to net loss of \$6 million in the same quarter of 2021 primarily as a result of the factors described above, partially offset by \$91 million higher tax expense.

Year to date

Sales of \$1,252 million increased 23% or \$231 million compared to 2021primarily due to improved results from the offshore wind facilities, contribution from the Spanish portfolio acquired in August 2021 further catalyzed by the increase in the market/pool price due to the recently announced regulatory changes, partially offset by the expiry of the PPA at Iroquois Falls and foreign exchange rate fluctuations.

Gross profit of \$1,121 million increased 22% or \$204 million compared to 2021 primarily due to same factors affecting sales in the period.

Operating costs of \$157 million is in line with the same period of 2021.

G&A costs of \$40 million increased 29% or \$9 million compared to 2021 primarily due to higher personnel and other costs supporting Northland's global growth, in line with management's expectations.

Development costs of \$33 million increased 16% or \$4 million compared to 2021 primarily are in line with the same quarter of 2021.

Finance costs, net (primarily interest expense) of \$159 million decreased 2% or \$3 million compared to 2021 as a result of scheduled repayments on facility-level loans.

Fair value gain on derivative contracts was \$363 million compared to a \$30 million gain in the same period of 2021 primarily due to net movement in the fair value of derivatives related to commodity, interest rates and foreign exchange contracts.

Foreign exchange loss of \$67 million was primarily due to unrealized loss from fluctuations in the closing foreign exchange rates.

There was no impairment in 2022, whereas, in the same period of 2021, an impairment of goodwill totaling \$30 million was recorded for Iroquois Falls due to the expiry of its PPA in December 2021.

Other income was \$30 million higher than the same period of 2021 primarily due to the gain on sale of two efficient natural gas facilities, partially offset by the share of increasing joint venture development costs.

Net income increased \$410 million for the six months ended June 30, 2022, compared to the same period in 2021 primarily due to the factors described above, partially offset by \$140 million higher tax expense.

4.5: Adjusted EBITDA

The following table reconciles net income (loss) to Adjusted EBITDA:

	Three mont	hs en	ded June 30,	Six mont	hs en	ded June 30,
	2022		2021	2022		2021
Net income (loss)	\$ 267,866	\$	(6,370)	\$ 555,446	\$	145,019
Adjustments:						
Finance costs, net	77,483		75,530	159,240		162,620
Gemini interest income	3,749		4,025	7,456		8,006
Share of joint venture project development costs	2,639		(3,102)	5,434		(3,857)
Acquisition costs	137		714	618		2,333
Provision for (recovery of) income taxes	85,708		(5,780)	186,262		46,485
Depreciation of property, plant and equipment	144,614		145,137	292,029		290,437
Amortization of contracts and intangible assets	15,545		9,703	25,603		19,643
Fair value (gain) loss on derivative contracts	(239,730)		13,077	(373,175)		(41,906)
Foreign exchange (gain) loss	34,575		16,365	66,949		46,031
Impairment loss	—		_	_		29,981
Elimination of non-controlling interests	(40,964)		(46,930)	(141,818)		(141,432)
Finance lease (lessor)	(1,614)		(2,408)	(3,278)		(4,263)
Other adjustments	(14,816)		2,922	(25,425)		3,590
Adjusted EBITDA	\$ 335,192	\$	202,883	\$ 755,341	\$	562,687

Gemini interest income reflects interest earned on Northland's €117 million subordinated debt to Gemini. Semi-annual principal payments to Northland will commence in 2027 until maturity in 2032. Northland consolidates the financial results of Gemini and, as a result, Northland's loan balances, investment income, and interest expense are eliminated upon consolidation. Gemini interest income is included in Northland's consolidated Adjusted EBITDA because it reflects returns generated from an investment in core assets.

Other adjustments primarily include non-cash income on equity investments and net proceeds from sale of two efficient natural gas facilities for the six months ended June 30, 2022.

Second Quarter

Adjusted EBITDA of \$335 million for the three months ended June 30, 2022, increased 65% or \$132 million compared to the same quarter of 2021. The significant factors increasing Adjusted EBITDA include:

- \$65 million contribution from the Spanish portfolio of onshore wind and solar facilities, including regulatory changes retrospective to January 1, 2022 accounted for \$22 million higher Adjusted EBITDA;
- \$42 million increase in contribution from a one-time management fee from Kirkland Lake that followed the restructuring and upsizing of its credit facility completed during the quarter and other operating optimizations;
- \$26 million increase in operating results at Gemini primarily due to higher APX and higher wind resource; and
- \$10 million increase in operating results primarily due to rate escalations at EBSA and higher wind resource at Canadian renewable facilities.

The factors partially offsetting the increase in Adjusted EBITDA include:

- \$17 million decrease in operating results due to loss in contribution as a result of the expiry of the PPA and subsequent sale of Iroquois Falls in April 2022; and
- \$3 million increase in G&A costs and growth expenditures to support global growth.

Year to date

Adjusted EBITDA of \$755 million for the six months ended June 30, 2022, increased 34% or \$193 million compared to the same period of 2021. The significant factors increasing Adjusted EBITDA include:

- \$128 million contribution from the Spanish portfolio of onshore wind and solar facilities, including regulatory changes retrospective to January 1, 2022 accounted for \$22 million higher Adjusted EBITDA;
- \$44 million increase in contribution from a one-time management fee from Kirkland Lake that followed the restructuring and upsizing of its credit facility completed during the quarter and other operating optimizations;
- \$32 million increase in operating results at Gemini primarily due to higher APX and higher wind resource;
- \$16 million increase in operating results primarily due to rate escalations at EBSA and higher wind resource at Canadian renewable facilities; and
- \$15 million increase in operating results at the German facilities primarily due to higher wind resource and fewer periods of unpaid curtailments.

The factors partially offsetting an increase in Adjusted EBITDA were:

- \$42 million decrease in operating results due to loss in contribution as a result of the expiry of the PPA and subsequent sale of Iroquois Falls in April 2022; and
- \$4 million increase in growth expenditures primarily driven by an increasing level of business development activities and an \$8 million increase in corporate G&A primarily due to higher personnel and other costs supporting Northland's global growth, in line with management's expectations.

4.6: Adjusted Free Cash Flow and Free Cash Flow

The following table reconciles cash flow from operations to Adjusted Free Cash Flow and Free Cash Flow:

	Three mont	hs en	ded June 30,	Six mont	hs en	ded June 30,
	2022		2021	2022		2021
Cash provided by operating activities	\$ 312,337	\$	361,076	\$ 758,956	\$	769,530
Adjustments:						
Net change in non-cash working capital balances related to operations	25,630		(87,077)	40,992		(102,126)
Non-expansionary capital expenditures	(18,480)		(8,656)	(31,310)		(17,614)
Restricted funding for major maintenance, debt and decommissioning reserves	(6,004)		(7,638)	(11,098)		(9,171)
Interest	(75,454)		(101,490)	(148,033)		(151,382)
Scheduled principal repayments on facility debt	(307,944)		(300,713)	(348,385)		(334,523)
Funds set aside (utilized) for scheduled principal repayments	125,152		135,579	(16,926)		3,910
Preferred share dividends	(2,741)		(2,698)	(5,441)		(5,397)
Consolidation of non-controlling interests	4,644		2,527	(41,804)		(39,213)
Investment income ⁽¹⁾	4,222		5,098	8,398		10,263
Proceeds under NER300 and warranty settlement at Nordsee One	21,164		9,343	38,876		17,109
Other ⁽²⁾	63,017		194	75,693		(1,393)
Free Cash Flow	\$ 145,543	\$	5,545	\$ 319,918	\$	139,993
Add Back: Growth expenditures	16,467		16,856	34,077		29,697
Adjusted Free Cash Flow	\$ 162,010	\$	22,401	\$ 353,995	\$	169,690

(1) Investment income includes Gemini interest income.

(2) Other mainly includes net proceeds from sale of two efficient natural gas facilities, EBSA refinancing, effect of foreign exchange rate hedges, Nordsee One interest on shareholder loans, equity accounting, acquisition costs and non-cash expenses adjusted in working capital excluded from Free Cash Flow in the period.

Adjusted Free Cash Flow, is a supplementary non-IFRS cash flow measure including associated per share amounts and payout ratios. Adjusted Free Cash Flow is calculated by excluding growth-related expenditures from Free Cash Flow. Management believes this measure provides a relevant presentation of cash flow generated from the business before investment-related decisions (refer to *Section 4.3: Growth Expenditures* for additional information). Management believes Adjusted Free Cash Flow is a meaningful measure of Northland's ability to generate cash flow, after on-going obligations, to reinvest in growth and fund dividend payments. Reinvesting in growth is a key part of Northland's long-term strategy.

Scheduled principal repayments on facility debt reflect repayments as paid. Funds set aside (utilized) for scheduled principal repayments allocates repayments across the quarters in order to more clearly reflect the Company's performance. Gemini's principal repayment schedule is weighted towards the first payment of the year to align with Gemini's expected annual cash flow profile, while Nordsee One and Deutsche Bucht's principal repayments are equally weighted. For 2022, Northland's share of Gemini, Nordsee One and Deutsche Bucht's scheduled principal repayments are &84 million, &88 million and &77 million, respectively (2021 - &83 million, &87 million and &78 million). For 2022, the Spanish portfolio's principal repayment is &60 million (2021 - &23 million).

Interest expense is reflected each quarter as accrued in net income and working capital or paid.

Other mainly includes net proceeds from sale of two efficient natural gas facilities, EBSA refinancing and the effect of foreign exchange rate hedges of \$30 million, \$17 million and \$33 million, respectively.

In 2014, Nordsee One was awarded a grant under the European Commission's NER 300 program. The total grant value of €70 million was recorded as a reduction in property, plant and equipment upon completion of the project. Cash proceeds from the grant are based on production volumes, and final cash payments are expected in 2023 for the production ceiling under the program to be met in 2022. Proceeds accrued under Adjusted Free Cash Flow are based on production during the period. For the six months ended June 30, 2022, and June 30, 2021, proceeds from this program, based on production, totaled \$7 million and \$7 million, respectively.

The following table reconciles Adjusted EBITDA to Adjusted Free Cash Flow.

	Three mont	hs er	nded June 30,	Six mont	hs en	ded June 30,
	2022		2021	2022		2021
Adjusted EBITDA	\$ 335,192	\$	202,883	\$ 755,341	\$	562,687
Adjustments:

Proceeds under NER300 and warranty settlement at Nordsee One	17,989		7,942	33,044		14,543
EBSA Refinancing proceeds, net of growth capital expenditures	3,953		_	16,777		_
Other ⁽¹⁾	20,261		(2,834)	18,094		(1,708)
Free Cash Flow	\$ 145,543	\$	5,545	\$ 319,918	\$	139,993
Add Back: Growth expenditures	16,467		16,856	34,077		29,697
Adjusted Free Cash Flow	\$ 162,010	\$	22,401	\$ 353,995	\$	169,690

(1) Other mainly includes Gemini interest income, net proceeds from sale of two efficient natural gas facilities, shareholder loan to Kirkland Lake and interest received on third-party loans to partners.

Second Quarter

Adjusted Free Cash Flow of \$162 million for the three months ended June 30, 2022, was 623% or \$140 million higher than the same quarter of 2021.

The significant factors increasing Adjusted Free Cash Flow were:

- \$33 million contribution from the Spanish portfolio of onshore wind and solar facilities, including regulatory changes retrospective to January 1, 2022 accounted for \$22 million higher Adjusted Free Cash Flow;
- \$33 million increase in contribution from a one-time management fee from Kirkland Lake that followed the restructuring and upsizing of its credit facility completed during the quarter and other operating optimizations;
- \$31 million increase in overall contribution across all other facilities primarily due to better operating results, as described above in Adjusted EBITDA;
- \$30 million net proceeds from the sale of two efficient natural gas facilities in April 2022; and
- \$8 million decrease in net interest costs as a result of scheduled principal repayments on facility-level loans.

The factor partially offsetting the increase in Adjusted Free Cash Flow was:

• \$19 million increase in current taxes primarily at the offshore wind facilities as a result of better operating results.

Free Cash Flow, which includes growth expenditures, totaled \$146 million for the three months ended June 30, 2022, and was 2,525% or \$140 million higher than the same quarter of 2021 due to the same factors as Adjusted Free Cash Flow.

Year to date

Adjusted Free Cash Flow of \$354 million for the six months ended June 30, 2022, was 109% or \$184 million higher than the same period of 2021.

The significant factors increasing Adjusted Free Cash Flow were:

• \$69 million contribution from the Spanish portfolio of onshore wind and solar facilities, including regulatory changes retrospective to January 1, 2022 accounted for \$22 million higher Adjusted Free Cash Flow;

- \$35 million increase in contribution from a one-time management fee from Kirkland Lake that followed the restructuring and upsizing of its credit facility completed during the quarter and other operating optimizations;
- \$30 million net proceeds from the sale of two efficient natural gas facilities in April 2022;
- \$26 million increase in overall contribution across all other facilities primarily due to better operating results, as described above in Adjusted EBITDA;
- \$14 million decrease in net interest costs as a result of scheduled principal repayments on facility-level loans; and
- \$13 million decrease due to scheduled debt repayments on facility-level loans.

The factor partially offsetting the increase in Adjusted Free Cash Flow was:

• \$30 million increase in current taxes primarily at the offshore wind facilities as a result of better operating results.

Free Cash Flow, which includes growth expenditures, totaled \$320 million for the six months ended June 30, 2022, and was 129% or \$180 million higher than the same period of 2021 due to the same factors as Adjusted Free Cash Flow.

The following table summarizes dividends paid, payout ratios as well as per share amounts;

	Three mont	hs end	ded June 30,	Six mon	ths en	ded June 30,
	2022		2021	2022		2021
Cash dividends paid to shareholders	\$ 48,442	\$	43,386	\$ 95,835	\$	83,339
Adjusted Free Cash Flow payout ratio - cash dividends ⁽¹⁾				39 %		56 %
Free Cash Flow payout ratio - cash dividends ⁽¹⁾				48 %		70 %
Total dividends paid to shareholders ⁽²⁾	\$ 69,472	\$	65,336	\$ 137,593	\$	126,030
Adjusted Free Cash Flow payout ratio - total dividends $^{(1)}$ (2)				39 %		77 %
Free Cash Flow payout ratio - total dividends ⁽¹⁾				46 %		97 %
Weighted avg. number of shares - basic and diluted (000s)	232,321		220,182	230,019		211,284
Per share (\$/share)						
Dividends paid	\$ 0.30	\$	0.30	\$ 0.60	\$	0.60
Adjusted Free Cash Flow — basic and diluted	\$ 0.70	\$	0.10	\$ 1.54	\$	0.80
Free Cash Flow — basic and diluted	\$ 0.63	\$	0.03	\$ 1.39	\$	0.66

(1) On a rolling four-quarter basis.

(2) Represents dividends paid in cash and in shares under the DRIP.

At June 30, 2022, the rolling four quarter Adjusted Free Cash Flow and the Free Cash Flow net payout ratio improved to 39% and 48%, respectively, calculated on the basis of cash dividends paid, compared to 56% and 70% for the same period ending June 30, 2021. The improvement in both net payout ratios was due to higher reported Adjusted Free Cash Flow. The Free Cash Flow net payout ratio was similarly improved compared to the same period ending June 30, 2021.

Sources of Liquidity in Addition to Adjusted Free Cash Flow to Fund Growth

In addition to generated Adjusted Free Cash Flow, Northland utilizes additional sources of liquidity to fund growth and capital investments. Additional liquidity sourced by management during the six months ended June 30, 2022, is summarized as follows:

	Six mont	Six months ended Ju			
	2022		2021		
Dividend Reinvestment Program (DRIP)	\$ 41,757	\$	42,691		
Release of funds from debt service reserve ⁽¹⁾	_		73,723		
Total Liquidity Generated Before Equity Offering	\$ 41,757	\$	116,414		
Equity offering (net proceeds)	294,683		950,421		
Total Liquidity Generated After Equity Offering	\$ 336,440	\$	1,066,835		

(1) 2021 represents the release of cash from Deutsche Bucht's debt service reserve account following the implementation of a debt service reserve facility when the senior debt was restructured.

SECTION 5: CHANGES IN FINANCIAL POSITION

The following table provides a summary of account balances derived from the unaudited interim condensed consolidated statements of financial position as at June 30, 2022 and December 31, 2021.

As at	June 30, 2022	December 31, 2021
Assets		
Cash and cash equivalents	\$ 942,767	\$ 673,692
Restricted cash	140,955	155,631
Trade and other receivables	474,952	383,308
Other current assets	86,569	77,950
Property, plant and equipment, net	9,099,647	9,586,466
Contracts and other intangible assets, net	483,803	497,635
Net derivative assets ⁽²⁾	440,101	_
Investment in joint ventures	124,686	131,134
Other assets ⁽¹⁾	1,033,561	1,037,913
	\$ 12,827,041	\$ 12,543,729
Liabilities		
Trade and other payables	\$ 570,750	\$ 504,583
Facility-level loans and borrowings	7,082,988	7,592,214
Net derivative liabilities ⁽²⁾	_	215,618
Net deferred tax liability ⁽²⁾	622,145	470,015
Other liabilities ⁽³⁾	733,647	795,588
	\$ 9,009,530	\$ 9,578,018
Total equity	3,817,511	2,965,711
	\$ 12,827,041	\$ 12,543,729

(1) Includes goodwill, finance lease receivable, long-term deposits and other assets.

(2) Presented on a net basis.

(3) Includes dividends payable, corporate credit facilities, provisions and other liabilities.

Significant changes in Northland's unaudited interim condensed consolidated statements of financial position were as follows:

- Cash and Cash Equivalents increased \$269 million primarily due to proceeds from the ATM program.
- *Property, plant and equipment* decreased by \$487 million primarily due to depreciation and foreign exchange fluctuation partially offset by construction-related activities.
- *Net derivative assets* increased \$656 million from a net derivative liability at December 31, 2021, primarily due to the effects of higher interest rates in Canada, the US and Europe and strengthening of the Canadian dollar against the Euro.
- *Facility-level loans and borrowings* decreased by \$509 million mainly due to scheduled principal repayments on facility-level debt and foreign exchange fluctuation partially offset by construction related drawdown.
- Other liabilities decreased by \$62 million primarily due to repayments of the revolving corporate credit facility outstanding from the proceeds of the ATM program in 2022.

SECTION 6: EQUITY, LIQUIDITY AND CAPITAL RESOURCES

Northland maintains sufficient liquidity to meet short- and medium-term cash needs and ensures that it has access to sufficient resources to capitalize on investment opportunities and to meet growth expenditure commitments, monthly cash dividend requirements and other needs in the normal course of operations. Northland finances these commitments through cash flow from operations, non-recourse project financing, securing partnerships, corporate credit facilities, convertible debentures and equity, such as common and preferred shares.

Dividends

Northland's Board of Directors and management are committed to maintaining the current monthly dividend of \$0.10 per share (\$1.20 on an annual basis) and are confident that Northland has adequate access to funds to meet its dividend commitment, including operating cash flows and corporate funds. The Board of Directors reviews the dividend policy periodically as part of Northland's overall capital allocation strategy to balance growth requirements and investor preferences.

Equity

The change in shares during 2022 and 2021 was as follows:

	June 30, 2022	December 31, 2021
	Shares	Shares
Shares outstanding, beginning of year	226,882,751	202,171,075
Equity offering	7,487,700	22,500,500
Shares issued under the LTIP	_	21,967
Shares issued under the DRIP	1,121,768	2,189,209
Total common shares outstanding, end of period	235,492,219	226,882,751

Preferred shares outstanding as at June 30, 2022, and December 31, 2021 were as follows:

As at	June 30, 2022	December 31, 2021
Preferred shares outstanding		
Series 1	4,762,246	4,762,246
Series 2	1,237,754	1,237,754
Series 3	4,800,000	4,800,000
Total	10,800,000	10,800,000

In their most recent report issued in May 2022, Standard & Poor's reaffirmed Northland's corporate credit rating of BBB (Stable). In addition, Northland's preferred share rating was reaffirmed on Standard & Poor's Canada scale of BB+. In September 2021, Northland received a second corporate credit rating of BBB (stable) from Fitch Ratings Inc., a global rating agency.

At June 30, 2022, Northland had 235,492,219 common shares outstanding (as at December 31, 2021 - 226,882,751) with no change in preferred shares outstanding from December 31, 2021.

As of August 11, 2022, Northland has 236,102,010 common shares outstanding with no change in preferred shares outstanding from June 30, 2022.

Liquidity and Capital Resources

The following table reconciles Northland's opening cash and cash equivalents to closing cash and cash equivalents:

	Three months ended June 30,			Six months ended June				
	2022		2021	2022		2021		
Cash and cash equivalents, beginning of period	\$ 1,203,634	\$	549,948	\$ 673,692	\$	434,989		
Cash provided by operating activities	312,337		361,076	758,956		769,530		
Cash (used in) investing activities	(71,550)		(141,396)	(151,030)		(275,477)		
Cash (used in) provided by financing activities	(480,319)		100,907	(288,944)		25,789		
Effect of exchange rate differences	(21,335)		(6,862)	(49,907)		(91,158)		
Cash and cash equivalents, end of period	\$ 942,767	\$	863,673	\$ 942,767	\$	863,673		

Year to date

Cash and cash equivalents for the six months ended June 30, 2022, increased \$269 million due to cash provided by operations of \$759 million, partially offset by \$151 million of cash used in investing activities, \$289 million in financing activities and \$50 million effect of foreign exchange translation.

Cash provided by operating activities for the six months ended June 30, 2022, was \$759 million comprising:

- \$555 million of net income;
- \$245 million in non-cash and non-operating items such as depreciation and amortization, finance costs, changes in fair value of financial instruments and deferred taxes; and
- \$41 million in changes in working capital due to the timing of payables, receivables and deposits.

Cash used in investing activities for the six months ended June 30, 2022, was \$151 million, primarily comprising:

• \$193 million used for the purchase of property, plant and equipment, mainly for the ongoing construction at New York Wind, La Lucha and Hai Long projects.

Factors partially offsetting cash provided by investing activities include:

- \$31 million of other mainly related to net proceeds from the sale of two efficient natural gas facilities; and
- \$9 million of restricted cash used mainly related to the ongoing New York Wind construction.

Cash used in financing activities for the six months ended June 30, 2022, was \$289 million, primarily comprising:

- \$348 million in principal repayments on facility-level debt;
- \$162 million in interest payments;
- \$159 million of common and preferred share dividends as well as dividends to non-controlling;
- \$45 million in net repayment under the corporate syndicated revolving facility; and
- \$5 million change in restricted cash, primarily from funds set aside for debt service.

Factors partially offsetting cash provided by financing activities include:

- \$295 million received from common shares issued under the ATM program; and
- \$133 million of draws on project debt primarily for construction of the projects.

Movement of foreign currencies, including primarily the Euro, U.S. dollar and Colombian peso, against the Canadian dollar decreased cash and cash equivalents by \$50 million for the six months ended June 30, 2022. Northland aims to mitigate the effects of exchange rate fluctuations through a variety of mechanisms, including foreign exchange hedges and natural hedges by corporate debt denominated in USD or Euro for operating expenditures.

Property, Plant and Equipment

The following table provides a continuity of the cost of property, plant and equipment for the six months ended June 30, 2022:

	 alance as at an 1, 2022	Additions	Other ⁽¹⁾	Exchange rate differences	Balance as at Jun 30, 2022
Operations:					
Offshore wind	\$ 6,644,941 \$	27,871 \$	12,227 \$	(399,458) \$	6,285,581
Onshore renewable	3,295,996	6,324	(4,823)	(92,642)	3,204,855
Efficient natural gas ⁽²⁾	1,777,927	1,462	(462,198)	_	1,317,191
Utility	528,970	12,611	(685)	(2,239)	538,657
Construction:					
Onshore renewable	527,894	110,773	(816)	14,448	652,299
Corporate ⁽³⁾	176,486	43,656	(22,420)	(2,051)	195,671
Total	\$ 12,952,214 \$	202,697 \$	(478,715) \$	(481,942) \$	12,194,254

(1) Includes disposal of assets and amounts accrued under the long term incentive plan ("LTIP"). In April, Northland completed the sale of two efficient natural gas facilities in Ontario, Canada.

(2) Excludes Spy Hill lease receivable accounting treatment.

(3) Additions primarily related to Hai Long capitalization in construction-in-progress.

Long-term Debt

Northland's operating facilities and projects under construction are financed primarily with non-recourse project debt with fixed or hedged interest rates and repayment schedules tied to the terms of the project offtake agreement. Following the commercial operations date (**COD**), each project is structured as a special-purpose entity so that an adverse event at one facility would not affect Northland's other facilities. By owning and operating high-quality assets and applying its deep, long-term experience, Northland expects to continue to enjoy a competitive cost of capital, which maximizes returns from growth opportunities.

The following table provides a continuity of Northland's debt for the six months ended June 30, 2022:

	 alance as at an 1, 2022	Financings, net of costs		epayments	Amort. of costs/fair value	Exchange rate differences	Balance as at Jun 30, 2022
Operations:

Onshore renewable	129,625	98,083		—	(1,385)	3,225	229,548
Corporate ⁽¹⁾	41,816	290,021		(335,042)	799	252	(2,154)
Total	\$ 7,634,039	\$ 422,992	\$	(683,426) \$	3,829	\$ (296,600)	\$ 7,080,834

(1) Deferred financing cost associated with the syndicated revolving facility is included within the other assets in the consolidated statement of financial position.

Additionally, as at June 30, 2022, \$100 million of letters of credit were outstanding under non-recourse project-level credit facilities for operational use.

Debt Covenants

Northland generally conducts its business indirectly through separate subsidiary legal entities and is dependent on the distribution of cash from those subsidiary entities to defray its corporate expenses, repay corporate debt and pay cash dividends to common and preferred shareholders. Most operating subsidiaries hold non-recourse debt, which typically prohibits distributions if the loan is in default (notably for non-payment of principal or interest) or if the entity fails to achieve a benchmark debt service coverage ratio, which is the ratio of EBITDA to scheduled principal and interest payments over a specified time period. Northland and its subsidiaries were in compliance with all debt covenants for the period ended June 30, 2022, with the exception of the matters outlined below, which have been resolved second quarter in accordance with the applicable credit agreements.

In March 2022, management identified debt compliance matters at certain Canadian operating facilities. The required corrective action was taken to resolve such matters in accordance with the terms of the respective debt agreements. These actions required to be taken resulted in a higher amount of cash being held at the subsidiary level, temporarily affecting reported cash on hand and available liquidity under the corporate revolving facility as at March 31, 2022. In second quarter, the higher cash balances at the subsidiaries were released as part of the regular, scheduled distributions for the affected operating facilities.

Corporate Credit Facilities and Letters of Credit

Northland's corporate credit facilities are available for general corporate purposes, to support operational, construction and development opportunities and to provide letters of credit issued on behalf of Northland. The corporate credit facilities are summarized in the following table:

	Outstanding									
As at June 30, 2022		Facility size		Amount drawn	letters of credit	Available capacity	Maturity date			
Syndicated revolving facility	\$	1,000,000	\$	— \$	161,017 \$	838,983	Sep. 2026			
Bilateral letter of credit facility		150,000		—	134,528	15,472	Mar. 2023			
Export credit agency backed letter of credit facility ⁽²⁾		100,000		_	48,150	51,850	Mar. 2023			
Export credit agency backed letter of credit facility		50,000		_	37,789	12,211	n/a ⁽¹⁾			
Total	\$	1,300,000	\$	— \$	381,484 \$	918,516				
Less: deferred financing costs				2,154						
Total, net			\$	(2,154)						

(1) The \$50 million facility does not have a specified maturity date.

(2) During the first quarter, Northland extended the credit facility maturity date to March 2023.

- Of the \$381 million of corporate letters of credit issued as at June 30, 2022, \$158 million relates to projects under advanced development or construction.
- During the six months ended June 30, 2022, Northland made net repayments of \$45 million on the syndicated revolving facility.

Northland's corporate credit facilities include provisions that allow for renewals at Northland's option, subject to approval by the lenders.

Refer to SECTION 7 of the 2021 Annual Report for the annual contractual maturities and scheduled payments of Northland's material financial liabilities as at December 31, 2021.

SECTION 7: SUMMARY OF QUARTERLY CONSOLIDATED RESULTS

Northland's consolidated financial results are affected by seasonal factors, contract provisions and extraordinary items, which result in quarterly variations. Northland's quarterly net income (loss) also varies due to any non-cash impairments/ recoveries and foreign exchange adjustments required to translate euro, U.S. dollar and Colombian peso denominated balances to the appropriate quarter-end Canadian dollar equivalent and due to fair value movements of financial derivative contracts.

Accounting policies and principles have been applied consistently for all periods presented in the following table.

In millions of dollars, except per share		Q2	Q1		Q4	Q3	Q2		Q1		Q4		Q3
information	:	2022	2022	2	2021	2021	2021		2021	2020		2020

Per share statistics													
Net income (loss) - basic ⁽¹⁾	\$	1.01	\$ 0.99	\$	0.45	\$ (0.03)	\$ (0.06)	\$	0.49	\$	0.11	\$	0.43
Net income (loss) - diluted ⁽¹⁾		1.01	0.99		0.45	(0.03)	(0.06)		0.49		0.11		0.42
Adjusted Free Cash Flow - basic		0.70	0.84		0.80	0.15	0.10		0.73		0.38		0.41
Free Cash Flow - basic		0.63	0.77		0.69	0.05	0.03		0.66		0.28		0.30
Total dividends declared	\$	0.30	\$ 0.30	\$	0.30	\$ 0.30	\$ 0.30	\$	0.30	\$	0.30	\$	0.30

(1) Net income (Loss), basic and diluted per share are adjusted due to correction of historical net income allocated to common shareholders and noncontrolling interests ("NCI") in 2021 and 2020.

SECTION 8: DEVELOPMENT, ACQUISITION AND CONSTRUCTION ACTIVITIES

In addition to completed acquisitions and investments made this year, summarized below are Northland's most significant projects under construction and under development as:

ScotWind Offshore Wind Project

On January 17, 2022, Northland announced that it was awarded two offshore wind leases in the Crown Estate Scotland auction with a total combined capacity of 2,340MW. The two leases, one fixed foundation (840MW) and one floating foundation (1,500MW), will extend Northland's development runway into the next decade, with commercial operations expected at the end of 2029/2030 for the fixed and early 2030s for the floating. In April 2022, Northland entered into an Option Lease Agreement with the Scottish government which provides the Company with development exclusivity over the two awarded sites for a period of up to 10 years. Northland has secured its right to the offshore region upon payment of GBP 20 million (\$33 million).

Nordsee Offshore Wind Cluster

On January 6, 2022, Northland and its German partner, RWE announced the formation of a 1,333MW Nordsee Offshore Wind Cluster partnership encompassing Nordsee Two (430MW), Nordsee Three (420MW) and Nordsee Delta (480MW). The formation of the cluster is expected to allow the realization of synergies in development, construction as well as operating costs, leading to enhanced returns for the projects.

In January 2022, Northland and its German partner, RWE Renewables GmbH (**RWE**), announced the formation of a 1,333MW Nordsee Offshore Wind Cluster partnership (the "**Cluster**") encompassing Nordsee Two (433MW), Nordsee Three (420MW) and Nordsee Delta (480MW). To further enhance the size and scale of the cluster and to realize additional synergies, Northland and RWE agreed to include a fourth project, resulting in the total size of the Cluster growing to over 1.5GW. The fourth project, Godewind, which is now included in the Cluster, will have production capacity of 225MW and is within proximity to the remaining projects. The transaction is pending formal closing. The projects are expected to be developed and managed on a joint basis by both parties and are expected to achieve commercial operations between 2026 and 2028. Northland holds a 49% interest in the Cluster with RWE holding 51%.

Colombian Solar Projects

In November 2021, Northland, in partnership with EDF Renewables, a subsidiary of Électricité de France S.A. (EPA:EDF), successfully submitted a joint-bid into the renewables auction in Colombia and was awarded the right to build two solar projects with a total combined capacity of 130MW. The solar projects will benefit from a 15-year PPA with multiple energy distribution and commercial entities in Colombia, starting in 2023. The PPA will be denominated in Colombian pesos and will have annual indexation to the Colombian Producer Price index (**PPI**). In addition, the projects will receive a reliability charge in US dollars, which is expected to account for approximately 10% of total revenues of the projects. Development progress at the 130MW Suba solar projects in Colombia continues, with the project team working to secure agreements and contracts needed as the projects move towards the financial close. The solar projects will benefit from 15-year offtake agreements with multiple energy distribution and commercial entities in Colombia, with commercial entities in Colombia. Northland has a 50% interest in the projects alongside its partner, EDF Renewables, with commercial operations expected in second half of 2023.

New York Onshore Wind Projects

Northland continues to progress its onshore wind projects in New York State ("**NY Wind**"), with construction activities at Ball Hill and Bluestone progressing as planned. The projects achieved financial close in the second quarter of 2021 and Northland expects to secure permanent tax equity investments for the two projects ahead of commercial operations in 2022. In early 2020, the projects were awarded 20-year indexed Renewable Energy Certificate (**REC**) agreements with the New York State Energy Research and Development Authority as part of renewable energy solicitations.

Construction activities at the Ball Hill and Bluestone onshore wind projects in New York State are progressing on schedule. The projects are expected to complete construction activities and commence commercial operations by the end of 2022. The total capital costs for the two projects are expected to be US\$600 million. The projects were previously awarded 20-year indexed REC agreements with the New York State Energy Research and Development Authority.

Northland's third onshore wind project in New York, High Bridge, which has been under development and was scheduled to achieve financial close in 2022 and commercial operations in 2023. Considering the current inflationary environment and the potential impacts from the expected passing of the *Inflation Reduction Act* bill in the United States, financial close and commercial operations are expected to occur later than originally planned.

Helios Colombian Solar Project

The first 10MW phase of Northland's 16MW Helios solar project in Colombia achieved commercial operations in the first quarter of 2022. Construction activities on the second 6MW phase have commenced, with commercial operations expected in late 2022. The project achieved financial close in 2021 and secured a 12-year PPA with EBSA, which, in turn, will secure offtake agreements with non-regulated customers.

Baltic Power Polish Offshore Wind Project

In March 2021, Northland completed its acquisition of a 49% interest in the Baltic Power offshore wind project ("**Baltic Power**") in the Polish Baltic Sea with a total capacity of up to 1,200MW of offshore wind generation, for total cash consideration of PLN 255 million (\$82 million).

In June 2021, the Baltic Power project, secured a 25-year Contract for Differences ("**CfD**") from Poland's Energy Regulatory Office under the Polish Offshore Wind Act at a guaranteed price of PLN 319.60 per megawatt hour (MWh), which is adjusted to annual indexation by Poland's annual average consumer price index. Upon successful achievement of all necessary approvals, construction of the Baltic Power is expected to commence in 2023 following financial close, with commercial operations anticipated in 2026.

La Lucha Mexican Solar Project

The 130MW solar project in the State of Durango, Mexico, completed its activities relating to the physical construction, however, certain activities relating to the energization of the project continue to be delayed. In order to achieve commercial operations, the facility requires energization followed by testing, which is conducted by CENACE (Independent System Operator) and CFE (Federal Electricity Commission). Final approvals, energization, testing and interconnection of renewable power projects have generally been delayed in Mexico by pandemic related government and CFE temporary office closures and reduced operating capacity. In addition, these processes have seen further delays that are likely related to the uncertainty created by the Mexican government's so far unsuccessful attempts to amend electricity sector regulations and constitutionally embedded legislation and timelines remain uncertain as a result. Efforts to secure commercial offtake and project financing are expected to be finalized only after commercial operations.

Hai Long Offshore Wind Project

Progress continues at Hai Long to advance the project towards financial close. Subsequent to quarter end, Northland announced the signing of a Corporate Power Purchase Agreement (**CPPA**) that covers 100 percent of the power generated from Hai Long 2B and 3, which have a combined capacity of 744MW. The agreement is with an investment grade counterparty (S&P: AA-) and is for a 20-year period at a fixed-price, commencing once Hai Long reaches full commercial operations in late 2026. The contracted price under the CPPA is more favourable than the fixed auction rate originally awarded in 2018 and is a key accomplishment as Northland progresses Hai Long towards financial close. In addition, the PPAs with Taipower are not affected by the signing of the CPPA and provide a backstop to the CPPA. With the CPPA signed, the Company is focused on securing non-recourse project level debt financing. While securing financing terms are still subject to several macro factors, there is currently strong lender interest from various global and local financial institutions in lending to the project for the long term.

Hai Long is owned 60% by Northland and 40% by Mitsui & Co. Ltd and Enterprize Energy Group. The project was allocated a total of 1,044MW (626MW net to Northland) by the Bureau of Energy of Taiwan under a FIT program and an auction process in 2019. Key aspects of the Hai Long project are presented in the following table:

Sub-project	Gross Capacity (MW)	Net Capacity (MW) $^{(1)}$	Year of Grid Connection	Type of Procurement
Hai Long 2A	300	180	2024	FIT
Hai Long 2B	232	139	2025	Auction
Hai Long 3	512	307	2025	Auction
Total	1,044	626		

(1) Represents Northland's 60% economic interest.

SECTION 9: OUTLOOK

Northland aims to increase shareholder value by creating high-quality projects underpinned by revenue arrangements that deliver predictable cash flows. Management actively seeks to invest in technologies and jurisdictions where Northland can benefit from an early-mover advantage and establish a meaningful presence while striving for excellence in managing Northland's operating facilities by enhancing their performance and value.

With the strong financial performance experienced through the first six months of the year, including the realized gains from the sale of two of the Company's efficient natural gas assets, along with the continued strength in European power prices, management is revising its stated financial guidance for 2022, for Adjusted EBITDA, Adjusted Free Cash Flow, and Free Cash Flow per share.

For 2022, Adjusted EBITDA is now expected to be in a range of \$1.25 billion to \$1.35 billion (\$1.15 billion to \$1.25 billion previously), Adjusted Free Cash Flow per share is now expected to be in the range of \$1.85 to \$2.05 (\$1.65 to \$1.85 previously) and Free Cash Flow per share is now expected to be in the range of \$1.40 to \$1.60 (\$1.20 to \$1.40 previously).

These ranges factor in higher expected debt repayments on certain European facilities, pending successful completion of refinancings, that are currently in progress and targeted to be completed later in 2022. The revised guidance ranges may be subject to further upside should power prices in Europe continue to trade at elevated levels for the remainder of 2022, particularly as it relates to Northland's offshore wind facilities.

Northland's financial position continues to be strong, and the Company remains well positioned to fund its growth objectives. Northland expects to be able to refinance any material maturities due in the next five years, moreover, over 95% of total debt is non-recourse to the Company. Northland also has access to a \$807 million undrawn corporate revolving credit facility with approximately \$1.0 billion of total available liquidity as of August 11, 2022, which can be utilized to fund growth projects that ultimately advance to financial close. Borrowings under the credit facilities are revolving, such that they are ultimately repaid from project financings at financial close, corporate and/or project-level financing optimizations and/or sell downs at or before financial close.

Northland's Adjusted Free Cash Flow finances growth expenditures, and corporate costs that support growth and new initiatives. With a focus on its BBB (Stable) credit rating from S&P and Fitch, Northland considers it preferable to employ low-cost corporate credit to fund investments in its capitalized growth projects, most of which are targeted for financial close in either 2022 or 2023. To the extent there is excess Adjusted Free Cash Flow generated by the Company through financial and operational outperformance, these additional cash flows will be used fund capitalized growth projects, thereby reducing the need for corporate debt or equity funding.

Northland also intends to execute a selective sell-down strategy of partial interests of certain of its development projects on or before financial close to allow the Company to: (i) manage jurisdictional exposures, (ii) crystallize some development profit prior to construction as a result of the de-risking of the project; (iii) enhance our Adjusted Free Cash Flow and liquidity position; and (iv) increase project returns, amongst other considerations. The Company will assess each opportunity individually and intends to remain a long-term owner in the renewable projects it develops. The Company's first notable development asset sell-down may occur as early as 2022, pending satisfactory terms to Northland.

For the year to date period ended	June 30, 2022	December 31, 2021	
Dividend Reinvestment Program (DRIP)	\$	41,757	\$ 88,975
Proceeds from asset optimizations, debt service reserves and net proceeds from asset sales $^{\left(1\right)}$		54,441	197,282
Total Liquidity Generated Before Equity Issuances	\$	96,198	\$ 286,257
Equity issuances (net proceeds) ⁽²⁾		294,683	950,421
Total Liquidity Generated After Equity Issuances	\$	390,881	\$ 1,236,678

The following table summarizes Northland's additional sources of liquidity that have been sourced by management:

(1) 2021 figure includes EBSA refinancing and Canadian facility up-financings.

(2) 2022 net proceeds resulting from activity under the ATM program.

Management continues to monitor global developments and their potential impact on Northland's business and financial results.

SECTION 10: LITIGATION, CLAIMS AND CONTINGENCIES

Litigation, claims and other contingencies arise from time to time in the ordinary course of business for Northland. None of these contingencies, individually or in aggregate, are expected to result in a liability that would have a material adverse effect on Northland. Refer to Note 13 of the unaudited interim condensed consolidated financial statements for additional information including any contingencies arising as a result of completed acquisitions.

SECTION 11: FUTURE ACCOUNTING POLICIES

Management assesses each new IFRS or amendment to determine whether it may have a material impact on Northland's consolidated financial statements. As at June 30, 2022, there have been no accounting pronouncements by the International Accounting Standards Board expected to materially affect Northland's consolidated financial statements beyond those described in Note 2.18 of the annual audited consolidated financial statements.

SECTION 12: FINANCIAL RISKS AND UNCERTAINTIES

For information on Northland's key risks, uncertainties, financial instruments and contractual commitments refer to Northland's 2021 Annual Report and the 2021 AIF filed electronically at www.sedar.com under Northland's profile. Other than risks described below, management does not believe there have been material changes in the business environment or risks faced by Northland during the period that have not been disclosed in the 2021 Annual Report or the 2021 AIF.

Northland's risk management objective is to mitigate fluctuations in cash flows and ensure stable levels of cash available to pay dividends to shareholders. Northland does not seek to mitigate fair value risk. Northland classifies financial risks into market risk, counterparty risk and liquidity risk. Northland manages financial risks by identifying, evaluating and mitigating financial risks in compliance with internal policies and external requirements under non-recourse project financing arrangements. Northland uses derivative financial instruments to manage certain financial risks but does not engage in speculative activity. Material financial risks are monitored and reported regularly to the Audit Committee of the Board of Directors. Refer to Note 17 of the 2021 Annual Report for additional information on Northland's risk management approach.

International Activities; Geopolitical Risks

Northland's activities outside of Canada are subject to risks inherent in undertaking international activities. These risks could involve, among other things, matters arising out of the policies of foreign governments, imposition of special taxes or similar charges by government bodies, restrictions on carrying on business or the revocation or non-issuance of licenses to carry on business by a foreign government, foreign exchange fluctuations and controls, civil disturbances and deprivation or unenforceability of contract rights or the taking of property without fair compensation. The Company's foreign properties, operations and investments may be adversely affected by local political, geopolitical, sociopolitical and economic developments, including nationalization, political instability, increased political tension between countries, laws affecting foreign ownership, acts or threats of terrorism or other hostilities, actions taken by other governments in response thereto, military actions or threats, cybersecurity incidents, government participation, royalties, duties, rates of exchange, exchange controls, currency fluctuation, taxation and new laws or policies imposed by governmental authorities, as well as by laws and policies of Canada affecting foreign trade, investment and taxation and other risks present in the jurisdictions in which we, our customers, our suppliers, and/or our partners operate.

The Company cannot accurately predict the impact that the ongoing conflict in Ukraine and/or the increased political tensions between China, Taiwan and the United States may have on its financial position or assets. The Company regularly monitors ongoing macroeconomic, political, financial market and government changes in all of the markets in which it operates to assess the potential for adverse effects on the Company's business, assets, investments, power purchase agreements, operations and/or its financial results.

SECTION 13: CONTROLS AND PROCEDURES OVER FINANCIAL REPORTING

Disclosure Controls and Procedures

A rigorous and comprehensive financial governance framework is in place at Northland and its subsidiaries. Northland's 2021 Annual Report contains a statement signed by Northland's Chief Executive Officer (CEO) and Chief Financial Officer (CFO) outlining management's responsibility for financial information contained in the report. Northland filed certifications, signed by the CEO and CFO, with the Canadian Securities Administrators in February 2022 in association with the filing of the 2021 Annual Report and other annual disclosure documents. In those filings, Northland's CEO and CFO certified, as required in Canada by National Instrument 52-109 (Certification of Disclosure in Issuers' Annual and Interim Filings), the appropriateness of the financial disclosures in Northland's annual filings and the effectiveness of Northland's disclosure controls and procedures. The CEO and CFO have certified to securities regulators the appropriateness of the financial disclosure onder CFO have certified June 30, 2022, and that they are responsible for the design of disclosure controls and procedures and internal controls over financial reporting. The interim filings include this MD&A and the accompanying unaudited interim condensed consolidated financial statements.

There have been no changes in internal controls over financial reporting during the quarter ended June 30, 2022, that have materially affected or are reasonably likely to materially affect Northland's internal controls over financial reporting.

Limitation on Scope

Northland completed the acquisition of the Spanish portfolio on August 11, 2021. Management has not fully completed its review of internal controls over financial reporting for the Spanish portfolio and has limited the scope of design, operation and evaluation of disclosure controls and procedures and internal controls over financial reporting. Such scope limitation is permitted in accordance with NI 52-109, since the Spanish portfolio was acquired less than 365 days before the financial year end. Management has performed procedures to assess the accuracy and completeness of the Spanish portfolio's financial information for the period covered by this MD&A, as summarized below.

As at	June 30, 2022

Notes to the Interim Condensed Consolidated Financial Statements

1. Description of Northland's Business

Northland Power Inc. ("**Northland**") owns or holds net economic interests, through its subsidiaries, in power-producing facilities and a power distribution utility as well as in projects under construction or in development phases. Northland's facilities produce electricity from clean energy sources for sale primarily under long-term power purchase agreements (PPAs) or other revenue arrangements with creditworthy counterparties. Northland's utility is a distributor and retailer of electricity compensated under a regulated framework. These operating assets provide stable cash flow and are primarily located in Canada, Germany, the Netherlands, Spain and Colombia. Northland's significant assets under construction and development are located in Mexico, Taiwan, Poland, Germany, Colombia and the United States.

Northland is incorporated under the laws of Ontario, Canada with common shares ("Shares"), Series 1 cumulative rate reset preferred shares ("Series 1 Preferred Shares"), Series 2 cumulative floating rate preferred shares ("Series 2 Preferred Shares") and Series 3 cumulative rate reset preferred shares ("Series 3 Preferred Shares") that are publicly traded on the Toronto Stock Exchange ("TSX"). Northland is the parent company for the subsidiaries that operate Northland's business. Northland's registered office is located in Toronto, Ontario.

These unaudited interim condensed consolidated financial statements ("Interim Consolidated Financial Statements") include the results of Northland and its subsidiaries, of which the most significant are listed in the following table:

	Geographic region ⁽¹⁾	% voting ownership as at June 30, 2022 ⁽²⁾
Offshore Wind		
Buitengaats C.V. and ZeeEnergie C.V. ("Gemini")	The Netherlands	60.0 %
Nordsee One GmbH (" Nordsee One ")	Germany	85.0 %
Northland Deutsche Bucht GmbH (" Deutsche Bucht ")	Germany	100.0 %
Onshore Renewable		
Nine solar facilities (" Solar ")	Canada	100.0 %
Northland Power Spain Holdings, S.L.U. ("Spanish portfolio")	Spain	98.5 %
Efficient Natural Gas ⁽⁴⁾		
Kirkland Lake Power Corp. (" Kirkland Lake ") ⁽³⁾	Canada	100.0 %
North Battleford Power L.P. ("North Battleford")	Canada	100.0 %
Thorold CoGen L.P. (" Thorold ")	Canada	100.0 %
Utility		
Empresa de Energía de Boyacá S.A E.S.P ("EBSA")	Colombia	99.4 %

(1) Geographic region corresponds to place of incorporation or, in the case of partnerships, registration, for all entities listed except North Battleford which is registered in Ontario, Canada.

(2) As at June 30, 2022, Northland's economic interest remain unchanged from December 31, 2021. Northland owns 100% ownership interest in all the facilities within the Spanish Portfolio, except for one wind facility, where Northland's ownership interest is at 66.2%.

(3) Northland holds a 68% controlling interest in Canadian Environmental Energy Corporation (CEEC), which holds 100% of the voting shares of Kirkland Lake. Northland's effective net economic interest in Kirkland Lake is approximately 87%.

(4) On April 7, 2022, Northland completed sale of its equity interest in Iroquois Falls and Kingston.

2. Summary of Significant Accounting Policies

2.1 Basis of Preparation and Statement of Compliance

These Interim Consolidated Financial Statements of Northland and its subsidiaries were prepared in accordance with International Accounting Standard (IAS) 34, *Interim Financial Reporting*, utilizing the accounting policies Northland outlined in its December 31, 2021 audited annual consolidated financial statements. The accounting policies are in line with International Financial Reporting Standards (**IFRS**) guidelines. The Interim Consolidated Financial Statements do not include all of the information and disclosures required in the annual consolidated financial statements and therefore should be read in conjunction with Northland's 2021 audited annual consolidated financial statements.

These Interim Consolidated Financial Statements are presented in Canadian dollars and all values are presented in thousands except where otherwise indicated. Certain prior period disclosures have been reclassified for consistency with the current period presentation.

The Interim Consolidated Financial Statements for the three and six months ended June 30, 2022 were approved by the Board of Directors on August 11, 2022.

2.2 Seasonality of operations

Northland's power generation and utilities distribution assets can experience higher or lower demand in the summer or winter depending on the specific regional weather. Consequently, Northland's interim operating results are subject to seasonal fluctuations and, thus, interim results are not necessarily indicative of annual results.

2.3 Basis of Consolidation

The Interim Consolidated Financial Statements comprise the financial statements of Northland and its subsidiaries as at and for the three and six months ended June 30, 2022. Subsidiaries are fully consolidated on the date Northland obtains control and continue to be consolidated until the date that such control ceases. Control is achieved when Northland is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Northland reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in the interim condensed consolidated statements of financial position and interim condensed consolidated statements of income (loss) from the date Northland gains control until the date control ceases. All intra-group balances, income and expenses and unrealized gains and losses resulting from intra-group transactions are eliminated in full.

2.4 New standards or amendments and forthcoming requirements

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of Northland's audited annual consolidated financial statements for the year ended December 31, 2021, except for the adoption of the applicable new standards effective as of January 1, 2022, as noted in the audited annual consolidated financial statements of Northland.

Northland has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

3. Property, Plant and Equipment

As at	June 30, 2022	C	December 31, 2021
Property, plant and equipment (" PP&E "), net	\$ 8,165,804	\$	8,812,225
Construction-in-progress	787,936		622,189
Lease right-of-use (ROU) asset	145,907		152,052
Total property, plant and equipment, net	\$ 9,099,647	\$	9,586,466

As at June 30, 2022, construction-in-progress primarily relates to the capitalization of construction projects including the La Lucha project in Mexico, the Hai Long project in Taiwan, the New York Wind projects in the United States and a solar project in Colombia.

On April 7, 2022, Northland completed the sale of two efficient natural gas facilities in Ontario, Canada with a net book value of \$5 million as at the sale date.

4. Investment in Joint Ventures

Set out below are the significant joint ventures of Northland as at June 30, 2022. The entities have share capital consisting solely of ordinary shares, which are held directly or indirectly, by Northland. The country of incorporation or registration is also their principal place of business, and the proportion of ownership interest is the same as the proportion of voting rights held.

Name of ontity	Place of business / country	% of ownership Ir	nterest as of	Carrying Amount as of		
Name of entity	of incorporation	June 30, 2022	Dec. 31, 2021	June 30, 2022	Dec. 31, 2021	
Baltic Power	Poland	48.6 %	48.6 % \$	120,712 \$	128,111	
Others				3,974	3,023	
Total investments in joint ventures			\$	124,686 \$	131,134	

With respect to Baltic Power pursuant to a joint venture agreement executed in 2021, Northland has made purchase price commitments of €33 million (\$46 million) to be funded over the period until March 2023, of which €16 million (\$22 million) have been funded as of June 30, 2022. These commitments have been recognized within trade and other payables and provisions and other liabilities in the Interim Consolidated Financial Statements.

The tables below provide summarized financial information for significant joint ventures. The information disclosed reflects the amounts presented in the interim condensed consolidated financial statements of the relevant joint venture and not Northland's share of those amounts. They have been amended to reflect adjustments made by Northland when using the equity method, including acquisition date fair value adjustments and differences in accounting policies.

Nordsee Offshore Wind Cluster

In January 2022, Northland and its German partner, RWE Renewables GmbH (**RWE**), announced the formation of a Nordsee Offshore Wind Cluster (the"**Cluster**") partnership encompassing Nordsee Two GmbH ("**N2**"), Nordsee Three GmbH ("**N3**") and Offshore-Windpark Delta Nordsee GmbH ("**Delta**"). As a result, Northland reduced its ownership interest in N2 and N3 from 85% to 49% and acquired a 49% interest in Delta. The loss of control in N2 and N3 resulted in a gain of \$15 million (≤ 10 million). Subsequent to the loss of control, since Northland and RWE jointly control N2, N3 and Delta under the terms of the agreement, the three projects are accounted using the equity method of accounting. As a part of this transaction, Northland also committed to paying \$20 million (≤ 14 million) to RWE on the date of the final investment decision taken for Delta, expected in 2026 to fund the historical development expenses of Delta. As of June 30, 2022, the carrying value of the Cluster amounts to \$0.3 million (≤ 0.2 million) and the carrying value of loan receivables from the Cluster amounts to \$8 million (≤ 6 million).

5. Facility-level Loans and Borrowings

Northland generally finances projects and its operating facilities through non-recourse, secured credit arrangements at the subsidiary level. These loans and borrowing are summarized in the table below:

	Rate ⁽¹⁾	Maturity	Amount drawn as at June. 30, 2022 ⁽²⁾	Amount drawn as at Dec. 31, 2021 ⁽²⁾
EBSA ⁽³⁾	3.7 %	2024	\$ 518,528	\$ 518,096
New York Wind	1.4 %	2024	229,549	129,624
Nordsee One ⁽³⁾	2.3 %	2026	572,465	678,059
Jardin ⁽³⁾	6.0 %	2029	69,570	73,223
Kirkland Lake	4.2 %	2030	46,688	11,800
Thorold ⁽³⁾	6.7 %	2030	219,762	227,137
Gemini ⁽³⁾⁽⁵⁾	4.0 %	2030	1,954,139	2,206,204
Mont Louis	6.6 %	2031	61,142	63,723
Solar Phase I ⁽³⁾⁽⁴⁾	4.4 %	2032	154,843	162,121
North Battleford ⁽³⁾	5.0 %	2032	521,132	539,032
Deutsche Bucht ⁽³⁾	2.4 %	2031	1,005,240	1,125,771
Solar Phase II ⁽⁴⁾	4.3 %	2034	111,799	116,026
McLean's	6.0 %	2034	103,365	106,587
Cochrane Solar ⁽³⁾	4.6 %	2035	153,165	159,084
Grand Bend	4.2 %	2035	289,389	297,469
Spy Hill ⁽³⁾	4.1 %	2036	122,085	124,584
Spanish portfolio ⁽⁶⁾	3.3% - 4.1%	2026-2041	950,127	1,053,674
Weighted average and total	3.5 %		\$ 7,082,988	\$ 7,592,214
Current			675,930	677,378
Long-term			\$ 6,407,058	\$ 6,914,836

(1) The weighted average all-in interest rates of the subsidiary borrowings.

(2) Excludes letters of credit secured by facility or project-level credit agreements.

(3) Net of transaction costs and/or fair value adjustments.

(4) Solar Phase I and Solar Phase II include the nine entities that comprise Solar.

(5) Includes the amount drawn on the senior debt and the third-party portion of subordinated debt.

(6) The weighted average interest rate and the weighted average remaining term to maturity for all the facility-level loans is 3.9% and 13 years, respectively.

As at June 30, 2022, \$100 million of letters of credit secured by facility or project-level credit agreements was outstanding (December 31, 2021 - \$94 million).

On June 2, 2022, Northland restructured and upsized its Kirkland Lake credit facility (the "Kirkland Lake facility"). The aggregate amount of the financing was upsized by \$34 million, net of closing costs, to \$47 million, and the loan maturity date was extended by eight years to March 31, 2030. The restructured Kirkland Lake facility continues to be denominated in Canadian dollars, with the applicable interest rate increasing to 4.2% (all in rate) from the previous rate of 2.8%.

For the six months ended June 30, 2022, Northland complied with all applicable contractual covenants, except for: (i) the requirement to fully fund certain debt service reserve and unplanned maintenance reserve accounts; and (ii) the covenants restricting the making of a distribution prior to ensuring those applicable reserves were fully funded, which were identified during the period. The foregoing matters do not constitute events of default under the applicable credit agreements if cured in accordance with the terms of such agreements. As at June 30, 2022, the required corrective actions have been taken in accordance with the applicable agreements. Accordingly, as at June 30, 2022 and as at the approval date of these Interim Consolidated Financial Statements, Northland continues to have an unconditional right to defer the payment of the loan over the contractually agreed term.

6. Corporate Credit Facilities

	Facility size	Amount drav as at June 3 2022	80,	Outstanding letters of credit	Available capacity	Maturity	-	Amount rawn as at cember 31, 2021
Sustainability linked loan (SLL) syndicated revolving facility ⁽²⁾	\$ 1,000,000	\$	— \$	5 161,017	\$ 838,983	Sep. 2026	\$	44,722
Bilateral letter of credit facility	150,000		_	134,528	15,472	Mar. 2023		_
Export credit agency backed letter of credit facility ⁽³⁾	100,000		_	48,150	51,850	Mar. 2023		_
Export credit agency backed letter of credit facility	50,000		_	37,789	12,211	n/a ⁽¹⁾		_
Total	\$ 1,300,000	\$	- \$	381,484	\$ 918,516		\$	44,722
Less: deferred financing costs		2,1	54					2,897
Total, net		\$ (2,1	54)				\$	41,825

(1) The \$50 million facility does not have a specified maturity date.

(2) The amount drawn on the syndicated revolving facility as at June 30, 2022 was nil (December 31, 2021 - US\$30 million, CAD nil and €5 million converted to CAD at the period-end exchange rates).

(3) During the first quarter, Northland got this credit facility maturity extended to March 2023.

(4) Deferred financing cost associated with the syndicated revolving facility is included within the other assets in the consolidated statement of financial position.

During the six months ended June 30, 2022, Northland made net repayment of \$45 million on the syndicated revolving facility.

Amounts drawn under the syndicated revolving facility are collateralized by a debenture security and general security agreement that constitutes a first-priority lien on all of the real property and present and future property and assets of Northland.

7. Equity

7.1 Common Shares

Northland is authorized to issue an unlimited number of Shares. The change in Shares during 2022 and 2021 was as follows:

	J	lune 30, 2022	December 31, 20		
	Shares	Amount	Shares	Amount	
Shares outstanding, beginning of year	226,882,751 \$	4,005,462	202,171,075 \$	2,955,840	
Shares issued under Equity offering	7,487,700	294,683	22,500,500	949,597	
Shares issued under the LTIP	_	_	21,967	911	
Shares issued under the DRIP	1,121,768	41,757	2,189,209	88,973	
Change in deferred taxes ⁽¹⁾	_	1,118	_	10,141	
Total common shares outstanding, end of period	235,492,219 \$	4,343,020	226,882,751 \$	4,005,462	

(1) Relate to difference in treatment between tax and IFRS.

Dividend Reinvestment Plan

The DRIP provides shareholders the right to reinvest their dividends in Shares with a discount to the market price as defined in the DRIP. Shares issued under the DRIP can be sourced from treasury or purchased on the secondary market at the election of Northland's Board of Directors. Northland's Board of Directors has the discretion to alter the discount or source of Shares issued under the DRIP.

Effective with the dividend paid on September 15, 2020, Northland changed the discount rate applicable to its DRIP, whereby common shareholders may elect to reinvest their dividends in common shares to 3% discount, from the previous 0% discount.

Share-based Compensation

Northland's Long-Term Incentive Plan (LTIP) provides for a maximum of 3,100,000 Shares to be reserved and available for grant to employees of Northland and its subsidiaries. As at June 30, 2022, 1,178,303 Shares remain available for future issuance under the LTIP. Shares may be awarded based on development profits, which arise from new projects or acquisitions ("Development LTIP"). The costs recognized for LTIP in the period depend on management's best estimate of a project's expected development profit and expected timing of project milestones. Awards under the LTIP may be settled in Shares or in cash, at the discretion of Northland's Board of Directors.

For the three and six months ended June 30, 2022, Northland expensed nil and \$0.5 million (2021 - \$0.4 million and \$0.4 million), respectively, of costs under the LTIP. No forfeitures are assumed to occur. The balance of accrued awards related to the Development LTIP is included in liabilities since these awards are expected to be settled in cash. For the three and six months ended June 30, 2022, Northland settled nil and \$2 million (2021 - nil and nil), respectively, of Development LTIP awards in cash related to development projects.

Shares may also be awarded under the LTIP to recognize achievements or attract and retain executives ("**Deferred Rights**"). Grants of Deferred Rights vest over a maximum of a three-year period, and the expected cost is expensed over the vesting period.

In addition to the LTIP, stock-based compensation in the form of Restricted Share Units (**RSU**) and Deferred Share Units (**DSU**) may be granted by Northland to employees and directors. These awards are settled and paid in cash and accounted for as a liability until paid.

Equity offering

During the six months ended June 30, 2022, Northland established an At-The-Market equity program ("**ATM program**") that allows Northland to issue up to an equivalent of \$500 million of common shares from treasury to the public from time to time, at Northland's discretion. Any Common Shares sold in the ATM Program will be sold through the TSX. The ATM Program will be effective until the earlier of July 16, 2023 and the date that all of the common shares issuable under the ATM Program have been issued, unless terminated prior to such date in accordance with the terms of the Equity Distribution agreement dated March 1, 2022.

During the three and six months ended June 30, 2022, Northland issued 4,308,600 and 7,487,700 common shares, respectively, under the ATM program at an average price of \$38.98 and \$39.94 per common share, respectively, for gross proceeds of \$168 million and \$299 million (net proceeds \$166 million and \$295 million), respectively.

Under the ATM program, as at August 11, 2022, Northland has issued a total of 7,918,000 shares at an average price of \$39.85 per share for gross proceeds of \$315 million (net proceeds \$311 million).

7.2 Preferred Shares

Preferred share dividends, excluding tax, were paid as follows:

	Three mon	ths en	nded June 30,	Six months ended June				
	2022		2021		2022		2021	
Series 1	\$ 953	\$	953	\$	1,906	\$	1,906	
Series 2	264		221		487		443	
Series 3	1,524		1,524		3,048		3,048	
Total	\$ 2,741	\$	2,698	\$	5,441	\$	5,397	

7.3 Dividends

Dividends declared per Share and in aggregate were as follows:

	Three mon	Six months ended June 3					
	2022	2021		2022		2021	
Dividends declared per Share	\$ 0.30	\$ 0.30	\$	0.60	\$	0.60	
Aggregate dividends declared							
Dividends in cash	48,470	44,568		96,330		84,973	
Dividends in shares	21,487	23,074		42,124		43,409	
Total	\$ 69,957	\$ 67,642	\$	138,454	\$	128,382	

8. Non-controlling Interests

Non-controlling interests relate to the interests not owned by Northland. Subsidiaries with non-controlling interests that are material to Northland's consolidated financial statements include Gemini (40%), Nordsee One (15%) and CEEC (32%). CEEC has voting control of Kirkland Lake but ownership interest of 8.8% as a result of non-voting ownership interest held by third-parties.

Summarized financial information for subsidiaries with material non-controlling interests in the interim condensed consolidated statements of financial position (shown at 100% totals) are as follows:

As at June 30, 2022		urrent assets ⁽¹⁾	Long-term assets	Current liabilities	Long-term liabilities
Gemini	\$	390,246 \$	2,592,417 \$	404,488	\$ 2,062,309
Nordsee		114,114	1,120,157	167,036	862,603
CEEC		58,486	32,689	48,574	51,784
Other ⁽²⁾		321,849	1,631,187	271,143	658,899
Total	\$	884,695 \$	5,376,450 \$	891,241	\$ 3,635,595

As at December 31, 2021	Current assets ⁽¹⁾	Long-term assets	Current liabilities	Long-term liabilities
Gemini	\$ 349,101 \$	2,891,749 \$	394,389	\$ 2,451,059
Nordsee	114,737	1,205,921	181,720	984,941
CEEC	35,392	23,738	27,805	10,046
Other ⁽²⁾	296,412	888,494	265,942	693,043
Total	\$ 795,642 \$	5,009,902 \$	869,856	\$ 4,139,089

(1) As at June 30, 2022, restricted cash of \$32 million (Dec 2021 - \$47 million) is included for Gemini, \$27 million (Dec 2021 - \$29 million) for Nordsee One where the availability of funds is intended for debt repayments.

(2) Other includes subsidiaries with non-controlling interests that are not individually material to Northland's consolidated financial statements, including: McLean's (50%), Grand Bend (50%), Cochrane Solar (37.5%), Energia (12%), EBSA (0.6%) and the Spanish portfolio (1.5%).

The change in material non-controlling interests during 2022 and 2021 is as follows:

	Gemini I	Nordsee ⁽³⁾	CEEC	Other ⁽²⁾	Total
As at January 1, 2022	\$ 149,464 \$	32,988 \$	10,847 \$	15,533 \$	208,832

As at June 30, 2021	\$ 146,270 \$	29,114 \$	26,134 \$	14,567 \$	216,085

(1) Net income (loss), dividends and distributions, and other comprehensive income (loss) are shown at the respective non-controlling interest share.

(2) Other includes subsidiaries with non-controlling interests that are not material to Northland's consolidated financial statements, including: McLean's (50%), Grand Bend (50%), Cochrane Solar (37.5%), Energia (12%), EBSA (0.6%) and Spanish portfolio (1.5%).

(3) As of January 1, 2022, Nordsee was comprised of NCI balances relating to Nordsee One, N2 and N3.

(4) Disposal of NCI relates to de-recognition of NCI interest of N2 and N3 due to formation of Nordsee Offshore Wind Cluster partnership, as disclosed in note 4. As of June 30, 2022, Northland holds a 49% interest in N2 and N3, and accounts them under equity method of accounting.

For three and six months ended June 30, 2021, as disclosed in note 16 of the annual financial statements for the year ended December 31, 2021, net income (loss) and other comprehensive income (loss) ("**OCI**") attributable to common shareholders and NCI were adjusted. The change in allocation increased net income (loss) attributable to common shareholders and decreased net income (loss) attributable to NCI by \$3 million and \$12 million for three and six months ended June 30, 2021, respectively. This resulted in the net loss per share – basic and diluted, for three months ended June 30, 2021, decreased from \$0.08 per share to \$0.06 per share and net income per share – basic and diluted for, six months ended June 30, 2021, increased from \$0.34 per share to \$0.40 per share, respectively. In addition, the change in allocation decreased OCI attributable to common shareholders and increased OCI attributable to NCI by \$4 million and \$1 million for three and six months ended June 30, 2021, attributable to common shareholders and increased OCI attributable to NCI by \$4 million and \$1 million for three and six months ended June 30, 2021, attributable to common shareholders and increased OCI attributable to NCI by \$4 million and \$1 million for three and six months ended June 30, 2021, respectively.

9. Financial Instruments

The derivative financial instruments consist of the following:

As at June 30, 2022		Current assets	Current liabilities	Long-term assets	Long-term liabilities	Total
Derivatives designated for hedge accounting	g					
Interest Rate Contracts	\$	1,196	\$ (25,634) \$	57,171	\$ (9,974) \$	22,759

Commodity Contracts	(39,095)	(2,297)	834		(16,935)		303	(57,190)
Total	\$ (582,631) \$	112,222 \$	29,416	\$	12,490	\$	20,636	\$ (407,867)

(1) Amounts recognized in "Change in fair value of hedged derivative contracts" in the consolidated statements of comprehensive income (loss), representing the change in fair value recognized in OCI, net of amounts reclassified to the consolidated statements of income (loss) on settlement.

(2) Amounts recognized in "Fair value (gain) loss on derivative contracts" in the consolidated statements of income (loss). These amounts represent fair value changes, net of realized gains and losses on settlements during the six months ended June 30. Realized gains and losses are recorded in "Finance costs, net" for interest rate contracts, "Foreign exchange (gain) loss" for foreign exchange contracts" and "Fair value (gain) loss on derivative contracts" for power forward contracts.

The objective of Northland's hedges is to reduce volatility in its cash flow related to changes in foreign exchange, interest rates and market prices for gas and power. The nature of the risks that Northland is exposed to and the related hedge objectives did not change in the three and six months ended June 30, 2022.

10. Net Income (Loss) per Share

The basic and diluted net income (loss) is calculated as follows:

	Three months en	ded June 30,	Six months ended June 30,				
	2022	2021	2022	2021			
Net income (loss) for the period attributable to common shareholders	\$ 238,032 \$	(11,328) \$	467,174 \$	89,583			
Less: preferred share dividends, net (Note 7.2)	(2,741)	(2,698)	(5,441)	(5,397)			
Net income (loss) attributable to common shareholders for basic and diluted earnings	\$ 235,291 \$	(14,026) \$	461,733 \$	84,186			

The basic and diluted share amounts are calculated as follows:

	Three months	s ended June 30,	Six months ended June 30,			
	2022	2021	2022	2021		
Weighted average number of Shares outstanding, basic and diluted	232,321,409	220,181,837	230,018,788	211,283,832		

11. Finance costs, net

Net finance costs consist of the following:

	Three months end	led June 30,	Six months ended June 30,			
	2022	2021	2022	2021		
Interest on debt, borrowings and bank fees	\$ 77,934 \$	74,337 \$	150,421 \$	150,482		
Amortization of deferred financing costs	112	945	7,716	11,024		
Others	(563)	248	1,103	1,114		
Finance costs, net	\$ 77,483 \$	75,530 \$	159,240 \$	162,620		

For the three and six months ended June 30, 2022, \$1 million and \$2 million of finance costs (2021 - \$3 million and \$4 million), respectively incurred from project financing related to facilities under construction were capitalized in construction-in-progress.

12. Operating Segment Information

Northland has identified operating segments as outlined below based on the nature of operations, asset class and materiality. Northland analyzes the performance of its operating segments based on their operating income, which is defined as sales less operating expenses.

Three Months Ended June 30, 2022	External Sales	Inter	company sales ⁽¹⁾	Tota	al Sales	Cost of sales	Operating Costs	i&A costs ⁽²⁾	De	epreciation of PP&E	Othe income	er 3)	Operating Income	Finance costs, net

(1) \$30 million of goodwill relating to Iroquois Falls facility was written off during 2021.

(2) Offshore wind is comprised of property plant & equipment from Germany and the Netherlands amounting to \$2,397 million and \$2,769 million, respectively.

13. Litigation, Claims, Contingencies and Commitments

Litigation, claims and other contingencies arise from time to time in the ordinary course of business for Northland. None of these contingencies, individually or in aggregate, are expected to result in a liability that would have a material adverse effect on Northland.

13.1 Milestone Payments for Development Project Acquisitions

In the course of business, Northland enters into acquisition agreements that may result in Northland making additional payments to the seller and/or directly to the development project previously acquired, upon the successful completion of certain milestones. As at June 30, 2022, Northland's best estimate of the future contingent payments are approximately \$118 million of contingent payments under its development projects arrangements, with a maximum of \$280 million. These contingent payments were not recognized in the consolidated statements of financial position.
